◀ ISHA JAIN, *17, Delhi*

» GOING FOR: Bachelor's of Science in Bioengineering, Stanford University, US

» WHY SHE WANTS TO GO

"Being interested in a range of subjects, I want the freedom to explore my interests in depth, something Stanford offers through its experiential and hands-on pedagogy. My interest in entrepreneurship will also be fuelled by the start-up culture in the US"

of destinations and the variety of courses attracting new recruits, all these speak of a tidal surge of sorts. In February this year, the Union ministry of education informed the Lok Sabha that 750,365 new students flew abroad for higher studies in 2022, the highest number in six years, and 161,642 more than in 2019. Confirmation comes from another quarter, as online platform Yocket found a total of 1.32 million Indian students studying abroad in 2022, up from 1.14 million in 2021. Gurugram-based Redseer Strategy Consultants expect the number to go up to 1.8 million by 2024. And though the US for long had more students from China than from any other country, that may well be changing. The US embassy issued a record-breaking 125,000 visas to Indian students last year, more than were issued to any other nationality. The OpenDoors report brought out by the Institute of International Education in the US documents a slowdown in the number of Chinese
