RPGIS sets to be the first & only IB PYP school in eastern India, aiming to bring the very best educational experience, shaping the minds of future generations and creating an indelible mark and transformative change in every young mind the school nurtures.

At the heart of our commitment to delivering an unparalleled educational experience are the exceptional faculty at RPGIS. Led by the visionary guidance of Principal Hema Chennupathy, winner of the GLSC Edu Icon 2023 Award, along with Academic Director Varsha Agarwal Rodewald, Head of School Mark Fox, and Chief Administrative Officer Riad Rojoa, who define what it means to be one of the finest international-grade schools in India. The RPGIS core values serve as guiding principles, encouraging students to actively engage, question, and explore within and beyond their educational journey. This enables them to discover their unique talents and passions, supported by our dynamic co-curriculum and top-tier sporting facilities. We believe that curiosity cultivates a thirst for knowledge and a drive to continually seek new insights, while instilling in our students a culture of compassion, empathy, kindness, and a strong sense of social responsibility, forming the very core RPGIS philosophy.

The school has a low teacher-student ratio of 1:5 that allows for personalised learning and tailoring education to each student's individual learning capabilities. This approach ensures that students receive the support and guidance they need to succeed academically and personally. The school is committed to inclusivity and provides dedicated special education needs (SEN) spaces to support students with diverse learning requirements.

RPGIS provides a dedicated design technology and robotics lab, also known as our Makerspace. It is equipped with tools, equipment, and resources to facilitate hands-on learning experiences in fields such as robotics & coding. Students can engage in problem-solving, critical thinking, and prototyping in this lab.

The school also provides a Young Innovators Lab, a dedicated space where students can immerse themselves in practical experiments and scientific investigations. This dynamic environment allows students to actively engage in hands-on learning. Through the Young Innovators Lab, students can explore the wonders of science, conduct experiments, and unleash their curiosity as they embark on exciting scientific discoveries.

Our thoughtfully & meticulously designed infrastructure at RPGIS allows each & every child to thrive in a multitude of academic and extracurricular pursuits.

For the performing arts, which include dance and drama, the school has dedicated spaces for students to create, rehearse, and perform, thereby acquiring the skills and dispositions that artists embody and showcase. The school also has a black box, a space for enhanced and focused performances made for students who want to pursue drama at a higher level.

A glow room for sensory play for our youngest learners and a black box for drama are designed and equipped for students to hone their drama skills.

A cutting edge music room, for learning diverse vocal +instrumental music with two separate individual practice rooms for students to focus on mastering individual instruments under the guidance of experienced teachers.

RPGIS understands the importance of creative, collaborative, and exploratory play in a child's development. The school provides activity spaces and informal breakout areas where students can engage in hands-on activities, collaborative projects, and creative play, fostering imagination and innovation. The school encourages environmental awareness and teaches sustainable practices. The kitchen garden is a space where
