Transforming Indian Healthcare for 25 Years

Amrita Hospital in Kochi is celebrating its 25th anniversary, marking an incredible journey of contributions to the Indian healthcare system. Starting as a 125-bed facility, it has grown into a renowned institution with 1,350 beds, known for advanced care and medical achievements.

With a vision to provide quality healthcare to Kerala, Amrita Hospital emerged as a solution to bridge the gap in affordable healthcare. It focused on treating a wide range of conditions, including heart valve diseases, diabetes, cancer, and other treatable illnesses. Since its inauguration on May 17, 1998, by former Prime Minister Atal Bihari Vajpayee, the hospital has achieved numerous medical milestones.

Amrita Hospital excels in healthcare with groundbreaking achievements, ranging from India's first fetal surgery to the latest innovative Extended Reality (XR) Supported System using AR, VR, and MR, revolutionizing advanced patient care, training, and research.

Beyond its facilities, Amrita Hospital actively contributes to charitable healthcare. It operates hospitals in Wayanad and Mysore, providing free treatment and subsidized care. Through community outreach and public health campaigns, it addresses local and global health challenges. The impact of its efforts is evident in the millions of patients who have received free treatment.

Research is a fundamental aspect of Amrita Hospital's mission. It collaborates with renowned institutions worldwide, aiming to find innovative and cost-effective solutions to healthcare challenges.

In 2022, Amrita Hospital expanded with the addition of Amrita Hospital in Faridabad, the largest privately-owned healthcare facility in India. With 2,600 beds, 81 specialities, and advanced imaging services, it offers top-tier quaternary care while emphasizing integration, standardization, and affordability. It hosts India's largest pediatric super-speciality centre and offers advanced support services, such as state-of-the-art lab medicine facilities and advanced imaging centres. Equipped with 64 modular operation theaters and 534 critical care beds, it can handle diverse procedures and emergencies. The hospital also houses the country's largest Precision Medicine and Radiation Oncology centre.
