RIVERS ON THE RAMPAGE

SUTLEJ

- Sutlej was overflowing due to heavy rains in its higher catchment areas as it passed through Kinnaur, Shimla, Kullu, Solan, Mandi and Bilaspur districts of Himachal before entering Punjab at Ropar
- Kahu in Bilaspur, for instance, got a record 171.5 mm rain on July 10

RAVI

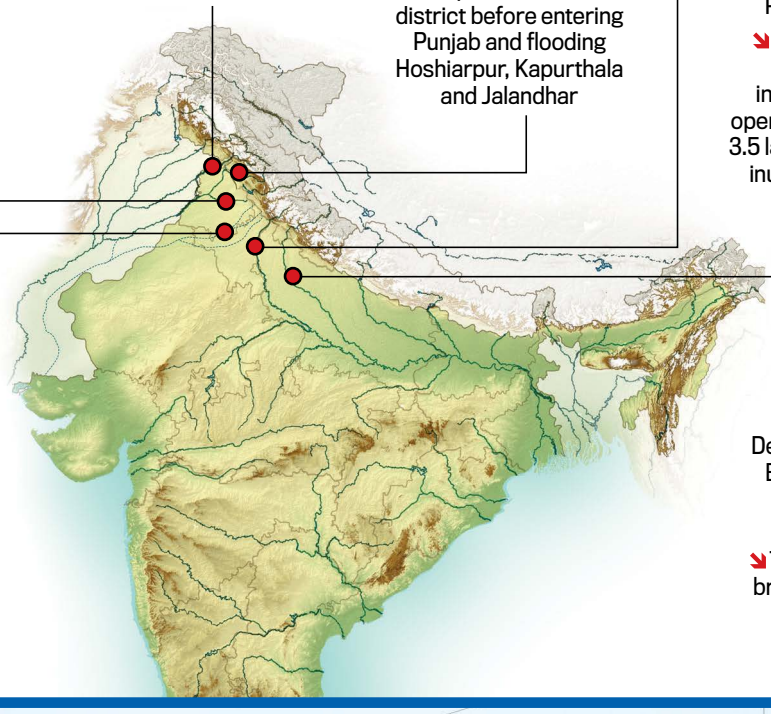

- Between July 7 and 10, the Ravi basin in Himachal's Kangra and Chamba districts received around 600 mm rain
- It led to flooding in Gurdaspur, Pathankot and Amritsar districts in north Punjab

BEAS

- Close to 950 mm rain recorded between July 7 and 10 in Himachal's Kullu district, where the Beas originates
- In spate, it caused mayhem in Mandi district before entering Punjab and flooding Hoshiarpur, Kapurthala and Jalandhar

YAMUNA

- An overflowing Yamuna, following heavy rain in its catchment area in Himachal and Uttarakhand, flooded the fields in Haryana's Yamunanagar, Karnal, Panipat and Sonepat
- As floodgates of the Hathnikund barrage in Yamunanagar were opened, the flow rose to 3.5 lakh cusec on July 11, inundating the eastern parts of Delhi

GHAGGAR

- It originates in Himachal's Solan district, which received a record 380 mm rain between July 7 and 10
- Downstream, Chandigarh and its periphery received 532 mm rain in 72 hours
- It flooded paddy fields in Punjab's Patiala/ Sangrur and Haryana's Panchkula/ Pinjore besides hitting water supply to capital Chandigarh

GANGA

- Surging for days, the Ganga on July 16 crossed the danger mark of 463 metres at Uttarakhand's Devprayag, where the Bhagirathi meets the Alaknanda to form the holy river
- The same evening, it breached the warning level of 293 metres in Haridwar too
