SKODA'S NEW SLAVIA GIVES YOU PLENTY OF REASONS TO CONSIDER A SEDAN OVER AN SUV WHILE ADDING A GENEROUS DOSE OF FUN

BY ABHIK DAS

S

Skoda realises its strength is that it is well regarded as a manufacturer who has consistently offered desirable sedans in India. Going on the offensive to increase its product portfolio, the new Slavia is the successor to the Rapid—and what they've created is a very likable offering. The Slavia instantly reminds you of the original Octavia in dimensions; visibly larger than the Rapid it replaces and well at par with the competition. The clean and bold lines of typical Skoda designs gives the Slavia a stretched look as the sloping roofline and sharp design cues follow from the front to the rear of the sedan. Riding on 16-inch wheels, the Slavia doesn't look under-tyred; rather, it looks proportionate, even sporty despite a good 179 mm of ground clearance.

Stepping inside the Slavia, the initial impression is that of a premium cabin with a mix of materials layered in black and beige. The dashboard layout has been kept tidy and minimal with the 10-inch touchscreen taking centre stage. It's paired with an 8-inch instrument cluster and a touch panel for the air-con controls, eliminating most physical buttons and making the interior feel contemporary. The infotainment system gets a few apps and is loaded with the latest connectivity features supporting both Android and Apple devices.

Engines: 1.0-litre, three-cylinder turbo-petrol
Power: 115 bhp @ 5,000 rpm
Fuel efficiency: 19.5 kmpl (claimed)
Boot space: 521 L
Price: 13.99 lakh (ex-showroom)
