CHAPTER 2: THE KNOWLEDGE

1 This is to entirely ignore the oldest archaeologically verifiable city on the Indian subcontinent: Mehrgarh, immediately south of one of the main gateways into India from the west, the Bolan Pass, which suggests links with other early urban communities to the west in places like Ur, Uruk, Eridu and Jericho. Excavations at Mehrgarh show that by about 6800 BCE a farming community was settled in mud-brick dwellings and engaged in pioneering
