10 My thanks here to Dr Cameron Petrie, co-director of the Land, Water and Settlement Project at the University of Cambridge and Banaras Hindu University. See also G. R. Schug, *Bioarchaeology and climate change: a view of South Asian Prehistory,* 2011; L. Gosian, P. D. Clift, M. G. Macklin et al, 'Fluvial landscapes of the Harappan Civilisation', *Proceedings of the National Academy of Sciences*, May 2012; and Y. Dixit et al, 'Abrupt weakening of the summer monsoon in northwest India 4,100 years ago', *Geology* 42 (4), 2014.

11 As far as the archaeological record is concerned, post-Harappan India underwent a virtual black-out that lasted for almost a millennium. Even the two phases of so-called Black and Red Ware (BRW) and Painted Grey Ware (PGW) pottery-making that span this Indian Iron Age culture are remarkably feeble in their artistry.

12 It is also found among the Romani or 'Gypsy' peoples who migrated westwards out of India about a thousand years ago – a striking but rare example of westward migration most probably initiated by the captivity of musicians and armourers who were serving as camp-followers to conquered Rajput armies.

13 The research threw up some anomalies. Three Adivasi tribal groups tested – the Chenchu and Valmiki in Andhra Pradesh and the Kellar in Tamil Nadu – as well as the
