

OMC MITSUI & CO.

Empowering lives in rural India by distributing reliable and affordable renewable energy.

OMC Power is one of the world's largest renewable energy based mini-grid Companies that is continuously working towards reducing carbon footprint and positively contributing to climatic changes. With its footprint across 350 villages of India, it has been a catalyst for rural infrastructural growth. Over 100,000 beneficiaries are today experiencing economic, safety and lifestyle improvements because of access to affordable, green and reliable energy from OMC. It is generating, storing and distributing 39MWHr renewable energy which is playing for a better tomorrow by providing green energy to all segments of the rural community- "A"nchor telecom towers; "B"usinesses; "C"ommunities, the ABC model of business which it pioneered. This ABC model of inclusive rural electrification is helping save over 13,000 metric tonnes of CO2 in a year. It plans to expand its footprint to 5,000 villages, pivot to cohorts of setting up EV infrastructure projects; Agricultural integration; Pure Drinking Water; Health & Education and Cold Chains. "Renewable energy, infrastructural growth, gender equality and lifestyle improvements are critical steps towards a better rural growth. We are committed towards our mission of enhancing rural development and upliftment on a Distributed Energy Platform." Says Rohit Chandra, Managing Director and CEO of OMC Power.

Since 2017, Mitsui has been a shareholder in OMC and together, Mitsui and OMC are expanding the distributed energy business model in India. At present OMC has installed approximately 350 power plants in UP and Bihar. In addition to clean energy access, OMC is venturing into other utility services for rural areas, thus making OMC not only a provider of reliable and affordable power, but also advancing economic and social development. This is expected to provide substantial socio-economic benefits and employment opportunities to the local village population in the area of the project.
