UTTAR PRADESH: AHEAD

In this era of Azadi ka Amrit Kaal, the Yogi government's first budget focused on making the state a one trillion dollar economy in the coming years for the development of state. The 2023-24 budget is historic in many ways. This is the Yogi government's sixth continuous budget and the second budget of his second term. It is also the biggest budget in the history of the state, to the tune of Rs 6,90,242 crore which, according to Chief Minister Yogi Adityanath will propel the economic growth of the state. The Yogi government kept in mind the welfare of all classes, including the poor, old age citizens, divyang, women and farmers. It has special focus on improved infrastructure and development, keeping in mind the heavy volume of investment which is going to come to the state after the Global Investor Summit 2023. Every citizen of the society has been kept at the centre of the budget.

It is the result of the guidance of Prime Minister Narendra Modi and the able leadership of Chief Minister Yogi Adityanath that now the economy of Uttar Pradesh is out of the clutches of Covid crisis. The numbers are self explanatory. The budget was 3.46 lakh crore rupees in the financial year 2016-17. Now the volume of the budget for financial year 2023-24 has increased to 6.90 lakh crore rupees. It's almost the double of the budget of the financial year 2016-17. Despite dealing with the crisis, the volume of the budget of Uttar Pradesh has increased 2.11 lakh crore rupees. The increase in GSDP of the state was 16.8% in 2021-22 which was better than the national average.

The expected growth rate in GSDP of the state for fiscal year 2023-24 is 19%. This is quite impressive in the era of global recession.

The unemployment rate was 14.4% in the state before the Yogi government came to power in 2017. Now it has reduced to 4.2%, which is also a big achievement for the state.

The Yogi government worked impressively on financial management, stopped the tax evasion. During this period no new tax was levied on the public, while the government gave relief in taxes on petrol and diesel. That is why today petrol and diesel are cheaper in UP in comparison to other states. Despite this, not only the tax collection of the state increased but also there was financial discipline and the revenue of the state too increased. The strong financial position of the state can be assessed by the fact that earlier 8% of the whole budget was spent in repaying the old loans and now due to better financial

"This budget will be the basis for a self-reliant Uttar Pradesh, working for its fast, all inclusive and comprehensive development. It will also lay the foundation for the state to become a one trillion dollar economy in the coming 5 years. The efforts which we made in the last 6 years in increasing the volume of the budget in a transparent manner has resulted in doubling the size of the budget."

—Yogi Adityanath, Chief Minister, UP
