capture the imagination of the world.

But the fact has to be faced that "free India" is still a thing of the future ! The intentions of the British Government with regard to Indian aspirations as embodied in the recently published White Paper show clearly that they are not yet prepared to part with an iota of real power. Apparently the British Government think that they are strong enough to resist successfully the demand of the Indian people. And if they are strong enough to resist us, it clearly shows that the most strenuous efforts of the Indian people since 1920 have failed to bring us appreciably nearer to our goal of "Swaraj".

India therefore must resolve to launch another fight on a bigger and more intensive scale. The intellectual and practical preparation for this must be scientific and must rest on objective foundations. The intellectual preparation for this task will entail the following measures :

(*i*) A scientific examination of the strong and weak points of British Rule in India in relation to the Indian people.

(*ii*) A scientific examination of the strong and weak points of the Indian people in relation to British Rule in India.

(*iii*) A scientific examination of the rise and fall of empires in other parts of the world.

(*iv*) A scientific examination of the history of freedom movements in other lands and a study of the gradual evolution of freedom in all its aspects in this world.

When this study is completed—and not till then—shall we be able to form a conception of the magnitude of the task that awaits us.

Our next requirement will be a party of determined men and women who will take upon themselves the task of delivering India—no matter what the suffering and sacrifice involved may be. Whether India will be able to free herself and to live once again as a free nation will depend on whether she can produce the requisite leadership. Her ability to produce the requisite leadership will be the test of her vitality and of her fitness for "Swaraj".

Our next requirement will be a scientific plan of action and a scientific programme for the future. The method of action begin-
