ike directly at England and, indirectly, at America. It is ıturally a disappointment for me that at the eleventh hour, my ɔurney to the Far East had to be abandoned, owing to reasons hat were purely technical, though everything possible had been done from the side of the German Government to help in the matter. Nevertheless, I remain an optimist and I have an intuitive feeling that a way will be found to make the journey possible.

I believe that it is technically possible for the German Government to help me to travel to the Far East—either by aeroplane or by submarine or by ship. There is a certain amount of risk undoubtedly in this undertaking, but so is there in every undertaking. That risk I shall gladly and voluntarily take. At the same time, I believe in my destiny and I therefore believe that this endeavour will succeed. I would be profoundly grateful to Your Excellency and to the German Government for the necessary help in this matter—regardless of the difficulty or risk or inconvenience entailed thereby. And the sooner I could travel, the better it would be for India and for the common cause.

Assuring Your Excellency of my warmest esteem,

I am,
Yours respectfully,
Subhas Chandra Bose
