

EMPOWERING A GREENER FUTURE

Grappling with unforeseen challenges and widespread uncertainty induced by the pandemic, NHPC has ensured the functioning of all its power stations 24x7. After increasing the share of renewable energy in its generation portfolio, NHPC is firmly on the path to achieve the ambitious target of being a 50000 MW company.

India's premier hydropower company, NHPC Limited (erstwhile National Hydroelectric Power Corporation) is the largest hydropower utility in the country. Incorporated on 7th November 1975, it is a Schedule "A" Enterprise and a Mini Ratna Category-I company of Government of India. NHPC, along with its subsidiary, operates 24 power stations with total installed capacity of 7071.2 MW. NHPC has diversified in solar & wind power sector also.

To increase the share of renewable energy in its generation portfolio, NHPC has set up a new wholly owned subsidiary company NHPC Renewable Energy Limited for the development of renewable projects, including small hydro and green hydrogen.

"The incorporation of NHPC Renewable Energy Limited shows our deep commitment towards tapping Renewable Energy which helps in reduction of carbon emissions and in producing clean and green energy", said Shri A.K. Singh, CMD, NHPC.

EXPANDING FOOTPRINT

NHPC, over the years, has acquired the technical capabilities and know-how to undertake all the activities related to setting up of hydro projects, right from conceptualisation to commissioning and operation. Presently, NHPC and its subsidiaries are engaged in construction of seven hydro projects with aggregate capacity of 5894 MW. Besides this, two solar power pojects of 105 MW capacity are nearing completion. Further, projects with total installed capacity of 47576 MW are in the pipeline. Hydropower projects with installed capacity of 35326 MW are the main constituent of the capacity under pipeline/ clearance stage while solar power projects will provide the remaining capacity.

NHPC is a financially sound and constantly profit earning organisation. The company has an investment base of about Rs. 70000 crore. During the Year 2020-21, NHPC earned a net profit of Rs. 3233 crore.

NHPC, since its inception, has been a responsible corporate citizen. It has facilitated long-term social and economic development of the project localities through extensive CSR works.

OVERCOMING PANDEMIC PAINS

The last two years have been full of unforeseen challenges and anxiety for the entire world. Even during these uncertain times, the 5000 plus hardworking and dedicated personnel of NHPC, led by CMD Sh. A K Singh, ensured that all the power stations generate power 24x7. NHPC not only ensured proper operation of its power stations but also brought five projects to construction stage. In April 2020, when the entire world was staring at a global recession, NHPC during this period successfully conducted e-reverse auction for the 2000 MW grid connected Solar PV Project. NHPC also earned record profits during the pandemic years. Today, NHPC is firmly on the path to achieve the ambitious target of being a 50000 MW company.

Last two years have indeed been historic for NHPC. Under the charismatic leadership of Shri A. K. Singh, Chairman and Managing Director, NHPC has evolved into a result-oriented organisation paving the path for a bright future. The Government of India and other state governments are allotting the biggest hydropower projects in the country to NHPC.

NHPC has paid a total dividend of Rs. 1183.05 crore to Government of India during the financial year 2021-22. The achievements of the past two years have instilled a great sense of confidence among the stakeholders of the company and today all are looking forward to it to scale greater heights of success.

To increase the share of renewable energy in its generation portfolio, NHPC has set up a new wholly owned subsidiary company NHPC Renewable Energy Limited for the development of renewable projects, including small hydro and green hydrogen.
