BE ON TOP OF TAXES WITH THIS RECKONER

New Tax Laws	Earlier	Now
1. Tax on interest earned on EPF (Employee Provident Fund) accounts	There was no limit to EPF contribution where taxation was applicable on interest earned on contribution	• Income tax on interest earned on EPF when employee contributes above ₹2.5 lakh • The limit is ₹5 lakh for persons who don't get contribution from employers (govt employees)
Impact: Salaried employees in the high income bracket can no more take advantage of tax-free returns from the high, guaranteed interest offered by EPF and put in more money than the mandatory EPF contribution. From this year, investments beyond the threshold will go into a separate account and the interest earned in this account will be easily tracked and taxed.		
2. Higher NPS (National Pension Scheme) contribution for state government employees	10% of dearness allowance (DA) and basic salary was deducted under Section 80CCD(2) made by their employer	Deduction up to 14% of their DA and basic salary towards contribution to NPS
Impact: This move brings parity between central and state government employees, as central government employees were allowed 14% of their DA and basic salary towards NPS contribution. Those eligible can contribute more towards their retirement savings.		
3. Cryptocurrency Taxation	No taxation on cryptocurrency and VDA	30% tax applicable on virtual digital assets (VDA), including cryptocurrencies
Impact: Budget 2022 introduced crypto tax and included VDA in the list. Any income from transfer of any VDA will be taxed at the rate of 30%. This tax is also applicable on cryptocurrency received as gift. Moreover, any losses incurred on the transfer of a VDA cannot be set off against any other income. Losses made on one type of cryptocurrency cannot be set off against the other. More regulations may come in force.		
4. Long-term capital gains (LTCG) capped	15% surcharge on LTCG tax was applicable only on sale of listed equity/ mutual funds	The 15% surcharge on LTCG tax will be extended to LTCG on assets such as real estate properties, physical gold, debentures, debt funds etc.
Impact: Will reduce the tax burden for investors in start-ups, manufacturing, bonds and other types of unlisted assets. There will be uniformity in the way LTCG will be taxed, doing away with any tax arbitrage among different financial instruments.		
5. Filing updated tax returns	One had a 5-month window from due date of filing to revise returns, but not updated return for decrease in liability	• Taxpayers can file an updated return within two years from the end of the relevant assessment year • Taxpayers to pay 25-50% more tax & interest on additional income while filing the updated return
Impact: Though taxpayers have been provided with flexibility to revise their tax returns by updating the same, the move comes at a cost and does not address concerns if a loss or decrease in tax liability is discovered		
6. Deduction under section 80EE	• For first-time buyers, benefit on home loan interest up to ₹ 1.5 L a year, over ₹ 2 L deduction limit under Sec 24 (b)	• The deduction under Section 80EEA available only for houses purchased before March 31, 2022
Impact: New home buyers in the affordable housing sector will no longer enjoy additional tax savings on the interest component of home loan repayment		
7. Modified Section 80DD for parents/ guardians of disabled	Insurance premium payment for disabled kids to be claimed after payout to disabled child after death of caregiver	Deduction is available on premiums on insurance policies even when the payout is received by the disabled child while the parent is alive
Impact: Parents of disabled children may explore policies with savings-linked options that could benefit their children and also be tax efficient.
