Through KCR Kit, **16** essential items are given to both mother and baby.

Under KCR Kit programme, so far **13.30** Lakh pregnant women were benefitted.

This has resulted in the increase of deliveries in the government hospitals from **30** percent to **56** percent.

In the last eight years, the mortality rate of lactating mothers decreased from **92** to **56**. The infant mortality rate has also decreased from **39** per thousand to **23** per thousand.

For the first time in the country, in Mulugu and Sircilla districts, Telangana Health Profile is being formulated on an experiment basis.

A NEW LIFELINE - IRRIGATION TRANSLATING TO FERTILE LAND

Once parched land with little or almost no crop produces, a turnaround of sorts took place with setting up the world's biggest irrigation project, Kaleswaram Lift Irrigation Project. This is the world's biggest multipurpose project built in a record time. In simpler terms, Telangana is at an elevation of 300 metres to 650 metres above mean sea level and River Godavari flows at an elevation of 100 metres below mean sea level, hence the Godavari waters is being lifted from 90 Mts to 618 Mts height as part of the project. Completed in a short span of 36 months, Kaleswaram Project is regarded as the Engineering wonder and Marvel in the World.

Kaleswaram project became a growth engine for the agrarian economy by providing water for two crops in a year to 45 Lakh acres. Today, Telangana has emerged as the state with one crore acres of fertile lands.

Fast-tracked growth is the mantra in the irrigation sector. The Telangana State government has completed the pending projects such as Kalwakurthy, Nettampadu, KoilSagar, Bhima, Yellampally, Mid Maneru, Devadula. Palamuru district once regarded as the famine ridden district has become fertile and the migration of labour has stopped.

The state government has modernised the Canals of Nagarjuna Sagar, Sriram Sagar, NizamSagar and other such old projects.

Under Mission Kakatiya, **46,531** lakes are revived. **15** Lakh acres ayacut was stabilised. This has resulted in the increase of the ground water table. It also resulted in developing the Aquaculture. Bio Diversity has also been increased.

Construction of **1200** Check Dams all over the state are at various stages of completion to revive rivers, lakes, streams. This will cost about Rs. **3,825** Crore.

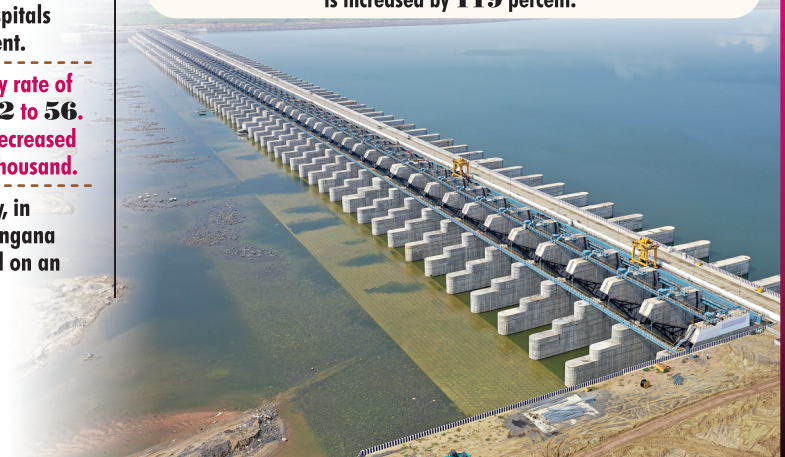

Works on Palamuru-Rangareddy, Sitarama, Dindi, Gattu Lift Irrigation Scheme, Chanaka-Korata projects are going on a fast track.

Three Anicuts, **20** Major water Lifts, **20** Pump Houses, **20** Reservoirs, several tunnels, Canals at a length of **2,000** Kms are all part of the Mega project.

The Kaleswaram project water is also used to revive the Sriram Sagar Project and for this, the Telangana state government is using the unique Reverse Pumping Technique.

With the construction of Kaleswaram Project, the state government has ensured that 100 TMC of water is stored in Godavari river.

With the major developments in the Irrigation Sector, the Ayacut is increased by **119** percent.

EXTENSION OF MEDICAL SERVICES - GOVT MEDICAL COLLEGES IN EVERY DISTRICT
