http://eciresults.nic.in/. Survey data is from the following election studies conducted by Lokniti, CSDS:

1. National Election Study 2014, Post Poll, conducted in 26 states; sample size: 22,301.
2. National Election Study 2014, Pre Poll, conducted in 21 states; sample size: 20,957.
3. Election Tracker January 2014 conducted in 18 states; sample size: 18,596.
4. Election Tracker July 2013 conducted in 18 states; sample size: 19,062.
5. National Election Study 2009, Post Poll, conducted in 29 states and one union territory; sample size: 36,641.
6. National Election Study 2004, Post Poll, conducted in 29 states and two union territories; sample size: 27,189.
7. National Election Study 1999, Post Poll, conducted in 20 states and one union territory; sample size: 9436.
8. National Election Study 1998, Post Poll, conducted in 18 states and one union territory; sample size: 8133.
9. National Election Study 1996, Pre Poll, conducted in 20 states and one union territory; sample size: 9602.

During all the above-mentioned surveys, face-to-face interviews with randomly selected voters from the most updated electoral rolls were conducted by specially trained field investigators. All National Election Study Post Poll data sets have been weighted by the actual vote shares garnered by the main parties/alliances in the respective election.
