HOW GOOD ARE THE PAY CHEQUES?

Average annual domestic salary earned by students through campus placements

Calcutta (IIM-C) has emerged the No. 1 B-school in the country, followed by IIM Ahmedabad at No. 2 and IIM Bangalore at No. 3. The IIMs occupy five of the top 10 positions in the rankings. Among the private institutes, the SP Jain Institute of Management and Research (SPJIMR) retains its numero uno position from the previous year, occupying fifth position in overall rankings.

What's encouraging is that the gap between the top-ranking institutes and those at the bottom is narrowing. The difference in overall scores between the top and bottom B-schools has almost halved from the previous year, down from 623 points to 319 (out of a total achievable score of 1,000). This qualitative gap needs to shrink further with a healthy and scientific competition among institutes.

34

PER CENT

Share of female students in the Top 25 B-schools, up from 28 per cent in 2015

That's the purpose of this survey—to constantly encourage the qualitative improvement of India's B-schools so that management education gets a collective boost. At the same time, the survey also takes note of the evolving changes in the management education space that was massively impacted by the Covid-19 pandemic and subsequent technological innovation. B-schools now have the flexibility in course delivery with three modes available—classroom, hybrid (blend of classroom and online) and fully online. Though educational institutes have reverted to classroom teaching, most of them have retained the online mode partly to plug in the gaps in terms of reach and affordability. Besides, the usage of modern pedagogical tools such as computer simulations, big data analytics, artificial intelligence, augmented reality, virtual reality, games and flipped classrooms are adding new dimensions to management training.

Such technological innovations have also created among the existing workforce fears of becoming redundant. So, there is an eagerness among a significant section of the workforce to opt for upskilling and reskilling. A large number of professionals and even students are now showing preference for shorter-duration modular programmes offering specific skills and capabilities. And management institutes are responding to these demands. According to a study by market analysis platform Future Market Insights, the global executive education market is expected to reach $109.6 billion by 2031 from $37.8 billion in 2021, growing at a CAGR of 11.2 per cent.

Considering these developments, the India Today Group-MDRA B-School survey has introduced two new categories for evaluation—one-year management courses and executive education programmes. While executive management programmes have been in vogue for some time, several top institutes such as the Ahmedabad, Bangalore and Kolkata IIMs, the Indian School of Business (ISB), SPJIMR and XLRI have also started the one-year format to cater to the growing demand.

In the introductory year, the win-
