for Defence Forces and partnered with the West Bengal government to train newly elected zilla parishad members on fiscal prudence, transparency, time management and teamwork.

With the rise of emerging technologies, the institute is teaching courses that can strengthen overall management education. These include Artificial Intelligence, Cyber Security, Machine Learning, Design Thinking and Industry 4.0, which integrates intelligent digital technologies into manufacturing and industrial processes. In addition, it offers online courses—for six months, a year, or even a shorter period—for working executives.

However, even as registration for IIMC's online or certification courses has gone up, the relevance of its traditional two-year management degree remains intact. According to the institute's 2021-23 placement report, the average annual salary offered to the 58th batch of MBA students was Rs 35.1 lakh and the highest domestic CTC and highest international CTC were Rs 1.1 crore and Rs 94.8 lakh, respectively. A total of 39 new recruiters participated in the placement. The stipend for summer internships averaged Rs 1.65 lakh for the 513 offers that the 466 students of the batch received this year.

The report also offers a peek into the vibrant student pool that IIMC continues to attract—58 per cent of the total 465 students came from B.Tech. background, 15 per cent had a B.E. degree, followed by 14 per cent with B.Com., B.B.A. and B.M.S. degrees. Thirty-nine per cent of these students were freshers, while the rest had work experience between one month and over three years. Four per cent of the students had an experience of more than 36 months.

One of the biggest achievements of the institute has been its ability to provide 100 per cent placement to its students even during the Covid-19 pandemic. Today, a key aspect of IIMC is that the students select the recruiters since there is a higher demand for graduates from the institute. To avoid inconvenience to the recruiters and to
