

home office, the powder room and the bar and dining space. On the other side, you find the home gym, guest washroom and bedroom and the kitchen.

A Vibrant, Hue Haven

We have used many colours in the space; I think we have used almost every colour on the spectrum but tried to tie it all together with white walls and a sage green bookcase. Since Mansi needed a therapy area, we placed the sliding folding doors that block off the living area from the home office cum therapy room. The best part? Even though there are all kinds of colours and textures going through the space the home harmoniously blends together.
