

Life smiled with FAITH, SECURITY AND DEVELOPMENT

Bhupesh government is giving a new shape to Bastar with rapid development

MR. BHUPESH BAGHEL
Chief Minister, Chhattisgarh

Resource and need based development reached to the last person in the last village

Positive changes have begun to take place in the lives of the residents of Bastar, whether it be on an economic, social, or political basis. This has been made possible due to the untiring efforts of state government, which first earned the trust of the people of Bastar, and then worked on a development plan that was based on their needs. Utmost attention was paid to the needs of the tribal class and strengthening their economic status. Children's education and health were kept paramount. Now the life of Bastar residents is becoming safe from every aspect.

Naxalism was a big challenge when Chief Minister Mr. Bhupesh Baghel assumed office. Before the year 2018, there used to be violent activities of Naxalites in about two-thirds of the area of Bastar. Special attention was given to provide basic facilities like education, health, electricity, water to the people living in these areas and to link them with livelihood related activities. The government also worked in these areas by changing the rules for the amount of DMF.

Big change from changed strategy

Chief Minister Mr. Bhupesh Baghel has kept his vision very clear regarding Naxal areas. He has asked the force deployed in the affected districts to work for basic and economic development along with security as well as confidence building exercise. Since 2018, 43 new security camps have been established in Bastar, fulfilling basic needs such as education, health, communication, roads, and livelihoods for the local population.

The Indravati River is no longer an obstacle for school children and villagers of Naxal-affected villages such as Cherpal, Tumrigunda, Pahurnar, and Kaurgaon in Dantewada district, thanks to the construction of the Chhindnar bridge by the district administration. This initiative has provided uninterrupted travel access to the villages in Dantewada, as well as in Narayanpur and Bijapur districts. The bridge was constructed for improving traffic facilities in the interior affected areas of the state. The state government has constructed a 712.00 meter long, 8.40 meter wide bridge in this culvert at a cost of Rs 3874.26 lakh. In the absence of a bridge, the villagers had to face a lot of problems during the rainy season.

The focus is on taking action

In order to empower the people of the forest area, the government tried to give them full rights to be free to cultivate and sell their produce by distributing Forestland rights letters (Vanadhikar Pattas). So far 4 lakh 38 thousand individual forest rights letters and 44 thousand community forest rights letters have been distributed. For the first time in the Abujhmad area, which comes under the purview of Narayanpur,
