DR. MANIMEKALAI MOHAN'S VISION FOR STUDENT'S HOLISTIC EXCELLENCE

"When school transformation is team-based, it works best. Student-teacher achievement is higher when we create more leaders", says Dr Manimekalai Mohan. With rigorous and engaging content supported by a positive and conducive environment, her students are able to achieve academic and sporting excellence at SSVM.

› **DR MANIMEKALAI MOHAN,** Founder, SSVM Institutions

The inspirational journey of Dr Manimekalai Mohan began in 1998. As the Founder and Managing Trustee of the prestigious SSVM Group of Institutions in Coimbatore - Tamil Nadu, she has risen up to become a renowned educationist, entrepreneur, and philanthropist, with a vision to disseminate multiple Indian and International Curricula under one roof, in the last 25 years.

"By offering varied curriculums, we provide students with the most comprehensive education possible," explains Dr Manimekalai Mohan. At SSVM, learners benefit from a variety of curricula such as CBSE, Cambridge International, IBDP & IBCP (Candidate School), Matriculation (Tamil Nadu State Board), NIOS, across grade levels, giving them the 'wonder of both worlds,' learning skills that can be adapted to any framework. "A firsthand observation of classrooms, detailed notes left for teachers, sharing exemplary practices, suggestions for improvement, and introduction of cutting-edge professional development and instructional resources ensure that every classroom receives the highest quality instruction available", says Dr Mohan. A wide range of students from around the globe can benefit from internationally recognised curricula - the Cambridge Programmes, the IBDP or IBCP at SSVM. "Students make the decision to switch and navigate the transition as seamlessly as possible with the motivation, support and guidance of our diverse community of Indian and international educators", shares Dr Manimekalai Mohan. A variety of assessment methods are also introduced to students, giving them plenty of opportunities to demonstrate their knowledge. As students become familiar with different curricula, they become more comfortable with different assessment methods. In this way, they will be able to excel at top universities as well as in a competitive workforce after graduating. "Through multiple curricula at SSVM, our goal is to create more positive educational experiences for learners", adds Dr Mohan.

"A high expectation for all students is one way to close the achievement gap", says Dr Manimekalai Mohan. Dedication to academic excellence is what makes SSVM strive to achieve greater heights with each passing year. The institution strongly believes in instilling strong values among its students. It is committed to improving the quality of every individual's life and society as a whole. The faculty and learners act responsibly and demonstrate moral awareness and integrity at all times.

"Every member of the school community deserves respect. A friendly, welcoming, problem-solving, no-blame, professional environment encourages our staff and students to participate in a wide range of activities", opines Dr Mohan. SSVM aims to provide students with an education that nurtures all aspects of their development holistically.

Dr. Mohan has dedicated her life to education and philanthropy. She has become a voice and pillar of support for women educators. She is a Member of the General Council, NCERT (an autonomous body under the Ministry of Education, Government of India). She is an outspoken proponent of modern education perspectives while assimilating Indian values. She is always in pursuit of setting higher goals for the institutions she heads. It is the legacy of the founder that inspired the school to adopt a powerful and innovative approach to education.

It takes women and educationalists like her to prepare our next generation.
