BYD SEAL

Build Your Dreams (BYD) unveiled the Seal sedan that's set to be launched in the fourth quarter of 2023. The design features an all-glass roof, four unique LED DRLs, split headlamps and flush door handles. BYD's proprietary technology Blade Battery has been used in Seal, integrated as a load-bearing component of the chassis. There are two batteries available with the BYD Seal, a 61.4kWh unit with 550km range and an 82.5kWh pack with 700km of range.

MG MG4

Morris Garages showcased the MG4 EV hatchback at the expo. MG intends this car to be sporty with a claimed 50:50 weight distribution and a low centre of gravity for better handling. The car also features a thinner, flatter battery pack which helps reduce the height of the car while the frame is MG's Modular Scalable Platform. The MG4 boasts impressive charging capability with a range of 200km in just five minutes, reaching 80 per cent within 15 minutes.

selection. A digital key even enables sharing of the car among users without a physical key. It is also the first Lexus to be built on the company's new, all-electric platform boasting a predicted 600km range and 0-100kmph sprint in just 3 seconds.

KIA KA4

Sold internationally as the new generation Carnival, the KA4 looks radically different and is bordering the large SUV design language. The dual-tone cabin of the KA4 is all about luxury and hence there are features like dual sunroofs, hands-free rear sliding doors, and a hands-free tailgate as well. We expect Kia to continue with the 2.2-litre diesel tuned to offer 200bhp and 440Nm of torque.
