#SUSTAINABILITYDRIVE

LONG WAY AROUND

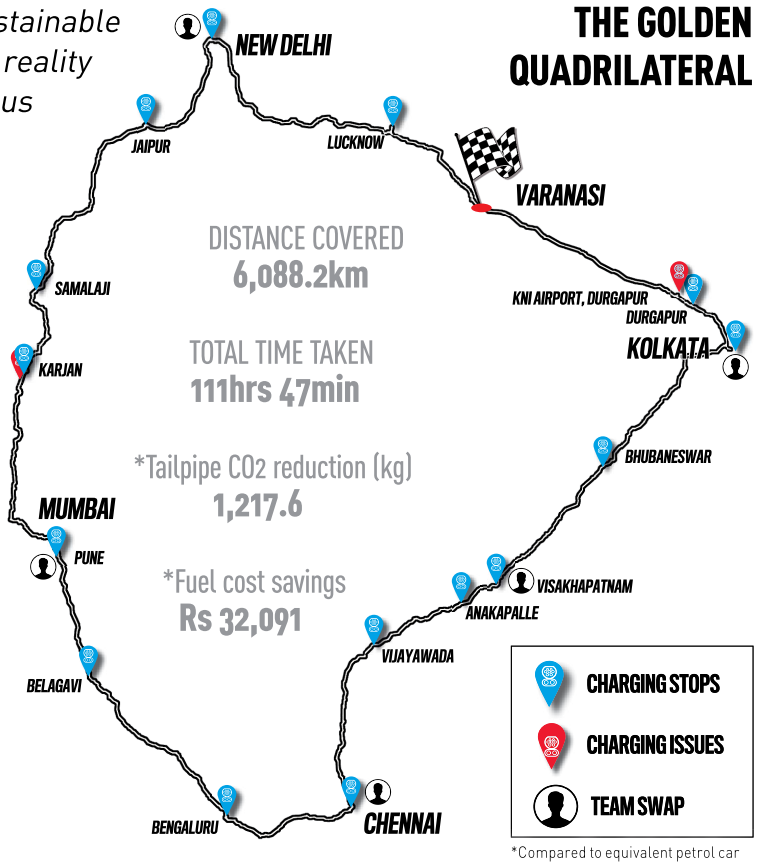

We set off on a quest to prove that sustainable mobility powered by electric cars is a reality today as we pull off a single, continuous drive around the country with the Mercedes-Benz EQS580 setting over 30 records in the process

By **DHRUV SAXENA**

In the past year, not only has charging infrastructure development for EVs been given a push, but a number of world class electric cars have also been launched in the country. So, when the question of whether India is ready for electric cars, especially for travelling long distances, came up we decided to find out for ourselves by embarking on a very ambitious drive across the country. It would cover the route connecting the four metro cities of India called the Golden Quadrilateral (or G-Quad for short).

We picked the Mercedes-Benz EQS580 for the #SustainabilityDrive because it is the car with the highest single-charge range currently on sale in India. Plus, Mercedes-Benz has the

THE GOLDEN QUADRILATERAL

*Compared to equivalent petrol car

Fastest to cover 6,000km in an electric car on public roads 110hrs 35min
