| ELECTRIC CAR RECORDS CREATED DURING THE DRIVE | | |
|---|---|---|
| 1 | Fastest Golden Quadrilateral round trip | 111hrs 47min |
| 2 | Fastest to cover 6,000km on public roads | 110hrs 35min |
| 3 | Fastest to cover 1,000km | 13hrs 45min |
| 4 | Fastest to cover 2,000km | 33hrs 10min |
| 5 | Fastest to cover 3,000km | 50hrs 29min |
| 6 | Fastest to cover 4,000km | 65hrs 54min |
| 7 | Fastest to cover 5,000km | 87hrs 51min |
| 8 | Maximum states covered in a single drive | 12 States |
| 9 | Highest average speed over 24 hours | 71.6kmph |
| 10 | Maximum hours driven in a single drive | 111hrs 47min |
| 11 | Maximum distance covered in 24 hours | 1718.5km |
| 12 | Fastest drive from Mumbai to Jaipur | 19hrs 47min |
| 13 | Fastest drive from Mumbai to Delhi NCR | 23hrs 06min |
| 14 | Fastest drive from Mumbai to Delhi | 24hrs 18min |
| 15 | Fastest drive from Jaipur to Delhi NCR | 1hrs 28min |
| 16 | Fastest drive from Jaipur to Delhi | 2hrs 40min |
| 17 | Fastest drive from Bengaluru to Delhi NCR | 40hrs 24 min |
| 18 | Fastest drive from Bengaluru to Delhi | 41hrs 36min |
| 19 | Fastest drive from Bengaluru to Mumbai | 16hrs 35min |
| 20 | Fastest drive from Kolkata to Chennai | 31hrs 16min |
| 21 | Fastest drive from Chennai to Bengaluru | 3hrs 38min |
| 22 | Fastest drive from Chennai to Mumbai | 22hrs 49min |
| 23 | Fastest to cross Rajasthan | 9hrs 45min |
| 24 | Fastest to cross Gujarat | 12hrs 01min |
| 25 | Fastest to cross Maharashtra | 9hrs 03min |
| 26 | Fastest to cross Karnataka | 12hrs 36min |
| 27 | Fastest to cross Andhra Pradesh | 18hrs 51min |
| 28 | Fastest to cross Odisha | 8hrs 38min |
| 29 | Fastest to cross Jharkhand | 2hrs 40min |
| 30 | Most states crossed by road in 24 hours | 5 states |
| 31 | Longest non-stop drive | 6,088.2km |

Nothing offers the kind of in-cabin experience the EQS does with its cutting edge MBUX Hyperscreen coupled with the soothing ambient lighting

The team along with the adjudicator Sugata Das (fourth from right) at the record felicitation at the Taj Ganges in Varanasi after being awarded two separate records both under the India Book of Records as well as the Asia Book of Records

Mercedes-Benz has the most widespread network of fast chargers in India and the EQS580 has the highest range

most extensive setup of fast and ultra fast chargers in the country. While we understood that it is not a car that is accessible to many, it can be viewed as a technology demonstrator of the capabilities of electric cars.

Midnight was the chosen time for the flag-off from the Taj Ganges, Varanasi on February 16. From traffic jams to charging related issues, power cuts, faulty chargers et al., we had to constantly improvise, adapt and overcome. The EQS kept us comfortable, while Mercedes-Benz's extensive network of fast chargers helped us stay on track as we drove through highways, some good, some bad, across the country's ever-changing landscape on our way to set the record. The app that the India Book of Records people had started at flag off was stopped as we entered the Taj Ganges in Varanasi after 111hrs and 47min on February 20 at 15:47hrs. The record was set!

Besides setting records, the #SustainabilityDrive proved that electric cars can be used to drive across the country and could well be the future of mobility. Although one can do that and do it in very good time, especially if the car is as capable as the Mercedes-Benz EQS580, the infrastructure still needs to come up to speed. Even with a much better network of fast chargers and without the traffic jams and other related troubles it will be difficult for other vehicles to break these records. It would be great to try this drive in another couple of years to see what progress the country has made in terms of the road network as well as the charging infrastructure.
