

SANTOSH IYER
MD & CEO,
Mercedes-Benz India

- **TARUN GARG**

Hyundai always ensures the highest level of compliance to all government regulations. We endeavour to offer customers the world-class quality, highest standards of safety and comfort at the right price. Our models comply with the latest norms, and we continue to ensure that the minimum cost burden is passed on to customers.

- **SANTOSH IYER**

Safety is our core philosophy and all Mercedes-Benz vehicles are equipped with the latest safety features and systems. Safer cars are the need of the hour and should be high on priority for all manufacturers.

- **TARUN GARG**

Sustainability is one of the key focus areas for Hyundai and our goals align with that of the government, to ensure we offer Indian customers the most efficient and environment-friendly mobility solutions. We have met government regulations in advance for multiple brands that are now RDE compliant and E20 fuel ready.

- **SANTOSH IYER**

Future is electric and we have already made the switch towards an all-electric future, reflected in our 'Ambition 2039' goal. In India, we estimate 1 out of 4 Mercedes-Benz sold to be an EV by 2027.

#BeTheBetterGuy
A Road Safety Initiative

HYUNDAI | Moving the world Together — A CSR initiative by Hyundai Motor India Foundation × INDIA TODAY GROUP

#RESPECTFORALL

The road network is an ecosystem that comprises not just motor vehicles, but pedestrians and cyclists as well. The rules have been charted out keeping all users in mind and for this ecosystem to work efficiently and safely, there needs to be mutual respect amongst all users. In order to #BeTheBetterGuy, it is vital to treat fellow road users with respect, be it other vehicles or pedestrians and cyclists. If you're behind the wheel of a four-wheeler or astride a two-wheeler, it's your responsibility to keep an eye out for pedestrians waiting to cross a road via a zebra crossing. In case the zebra crossing is accompanied by a stop signal, ensure your vehicle doesn't just come to a stop, but does so before the black and white stripes leaving ample space for pedestrians to walk across. In case there is no stop signal and there are people waiting to cross the road, the right thing to do is to bring your vehicle to a halt to allow them to cross over safely. Cars like the Hyundai Tucson can lend a helping hand as well with audiovisual warnings for upcoming pedestrian crossings especially in the vicinity of schools. Slow down if you hear that warning or if you see it pop-up on the instrument cluster and if you see pedestrians waiting by the side of the road to cross, stop and let them do so.

Respect for fellow road users is a two-way street so, as a pedestrian, you too have to act responsibly. Adhere to traffic signals and cross only when the walking signal turns green. Use only designated zebra crossings to cross the road. Needless to say, jaywalking is a strict no-no. Instead of risking your life running across the road to save a few minutes, walk a few extra steps to the nearest pedestrian overpass or underpass and cross the road safely. With ADAS equipped cars, front collision warning (FCW) with forward collision avoidance assist (FCA) can keep mishaps at bay, but let's not let it reach that point. As a driver or pedestrian, follow the rules, stay out of harm's way. Exercise patience and be considerate towards fellow road users.
