16 JULY 2022
Prime Minister Narendra Modi inaugurated the 296 km long Bundelkhand Expressway constructed with around 14800 crore rupees at gram katheri in orai tehsil of Jalaun district.

system has been placed every 500 meters. Under this system a 20 meter long drain has been constructed to pass the rain water which comes on the road. This drain connects with another line drain made at the ground and the water will pass through line drain and go to the pit. In this way the whole water will go under the ground. UPEIDA and the forest department together are developing green belt along with the Expressway. For this around 108.4161 hectare land is being developed as forest land in the all seven districts which come under the impact of Bundelkhand Expressway. Apart from it saplings are being planted in approximately 840 hectares of land which falls in the median area and along with the Expressway.
