Panasonic

PANASONIC AIR CONDITIONERS ENABLING A SUSTAINABLE AND SMART LIVING

Since our founding more than 100 years ago, Panasonic has been committed towards contributing to society and supporting our customers' quality of life and our Air Conditioners is one such example. Panasonic ACs were first developed in 1958 in Japan and ever since, we have been evolving our technology. We manufacture ACs across 7 countries, sell across more than 100+ countries with more than 12 crores+ customers, infact, every 5 seconds a Panasonic AC is being sold somewhere.

Fumiyasu Fujimori, Managing Director, Panasonic Marketing India, Panasonic Life Solutions India, said, "As consumers become increasingly aware of the importance of sustainable living, they are seeking smarter solutions that not only offer comfort but also cater to their environmental needs. At Panasonic, we understand this need and have designed our Inverter ACs to meet these requirements. Our Made-in-India ACs are equipped with several innovative technologies such as nanoe technology for a sustainable living, inverter tech. for optimum performance, R32 refrigerant - to minimize our impact on the environment to name a few. Similarly, through our Miraie platform our customers can enjoy comfort, convenience, and connectivity. From keeping a check on air quality to personalized sleep profiles, our ACs cater to your specific needs while ensuring healthy living spaces.

FUMIYASU FUJIMORI
Managing Director, Panasonic Marketing India, Panasonic Life Solutions India

With over 60 years of experience in AC manufacturing, we are proud to be Japan's No.1 Appliances brand. Panasonic ACs are known for Quality and 84% of our AC customers choose Panasonic brand during repeat purchase. In India, 96% of the ACs sold are inverter ACs and we are pleased to witness the continuous rise in demand for smart, inverter ACs that offer healthier indoor air quality."

VOLTAS

The **undisputed leader** in Cooling Products, launches its 2023 range of Inverter ACs with convertible cooling technology.

PRADEEP BAKSHI
Managing Director & CEO, Voltas Limited

Voltas, the leading Indian cooling products brand from Tata, has launched its 2023 range of Inverter ACs, featuring convertible cooling technology within the Adjustable AC range, along a host of advanced features. The new lineup of Voltas PureAir Adjustable Inverter ACs comes with HEPA filters, multi-adjustable modes, and Super UVC technology, ensuring pure and flexible tonnage air conditioning.

The new AC range boasts a 6-stage adjustable mode, allowing users to switch between multiple tonnages based on ambient heat or the number of people in the room. Other features include PM 1.0 sensor and AQI indicator to purify indoor air, anti-corrosive coating for durability, and energy-efficient performance.

The 2023 range also includes advanced features such as super silent operation, ice wash, and filter cleaning indicator for enhanced performance. In addition, the company has introduced new SKUs across its product lines, including air conditioners, air coolers, and commercial refrigeration.

Research shows that Indian consumers are prioritizing comfort, convenience, cooling, health, and hygiene when upgrading home appliances. Four out of five Indians desire air conditioners with purification technology that quickly removes pollutants & germs from indoor air. This trend is likely driven by the continued prevalence of hybrid work modes and the reliance on technology for comfortable living.

Pradeep Bakshi, Managing Director & CEO of Voltas Limited, commented on the launch, stating, "In line with the market demand for health & hygiene products, Voltas has introduced its latest Inverter AC range with a unique value proposition of 'Pure & Flexible Air Conditioning'. With convertible cooling technology and a 6-stage adjustable mode, the new range offers numerous features for added comfort and convenience."

The 2023 Voltas AC range includes 64 new SKUs, with 50 in Inverter ACs, 42 in Split Inverter ACs, and 8 in Window Inverter ACs, along with Cassette and Tower ACs. To make the new cooling appliances more accessible, Voltas is offering attractive financing options, including up to 15% cashback, easy EMI financing, lifetime inverter compressor warranty, and 5-year extended warranty.
