NEW-AGE TEACHER: CHATGPT IN CLASSROOMS

SANTOSH KUMAR
CEO & Co-founder, 21K School

"Students have to be allowed to use ChatGPT; it's a fantastic tool for learning...I don't think kids are using it for writing assignments. They can't because the way the NEP is progressing and everyone is upskilling, it's going towards critical thinking"

REKHA KRISHNAN
Principal, Vasant Valley School

"ChatGPT is a reality and we can't shy away from it. As teachers, we need to use it smartly. Perhaps in some ways, we need to say it's like a new-generation calculator; so we need to tell the children to use it judiciously"

PRASHASTI RASTOGI
Director, Coursera, India

"Technology has always been at the centre of access and inclusion...there is a human element that's becoming increasingly important because of technology. That's where the role of the teacher becomes even more active"

ABHA ADAMS
Educator & Author

"The real issue for educators is how do you judge a child's work when you can't trust the provenance or origins.... If [children] lose the cognitive ability to think deeply, they just become like ChatGPT. You need the creativity and personal voice"

HOW CAN INDIA PRODUCE GLOBALLY TOP-RANKING UNIVERSITIES?

DR DINESH SINGH
Chancellor, K.R. Mangalam University

"Universities should redesign their curriculum—not just their syllabus—around the needs and challenges of society and of the nation. Make it trans-disciplinary. Make sure your pedagogy is driven by collaborative project, problem-solving mode"
