MGM HEALTHCARE

DR. ROOPESH KUMAR

Neurosurgeon Extraordinaire

India's leading Neurosurgeon has risen from a humble background to stand shoulder to shoulder with the world's best exploring the final frontiers of our brain. Inspired by his mother, he is wiping the tears of countless mothers today.

It took a mother to discover the healer in her son. Her 8 year old son managed to cure her with some paracetamol tablets, when her husband was away and there were no doctors nearby. Her words of admiration surely seem to have worked.

The seeds were firmly sown in young Roopesh's mind, and he rose to emerge as a Surgeon. Fascinated by the nascent field of Neurosurgery, he honed his craft with a Masters in Neurosurgery in NIMHANS, Bangalore, Starting twenty years ago, when instruments weren't as sophisticated, he has carved out a reputation for himself in Vascular Bypass, Cerebro Vascular Surgery and Skull Base Surgery.

Dr. Roopesh Kumar is the Director of Neurosurgery at MGM Healthcare. Having published over 52 articles and contributed to renowned textbooks, the trailblazing Dr. Roopesh Kumar is a much in demand domain expert at various National and International Surgical Societies.

At MGM Healthcare, he is breaking new grounds, pushing the boundaries of surgery, offering solutions and solace where none existed before. Besides his areas of expertise like Cerebrovascular Surgery and Skull base surgery, he has been pioneering novel procedures in Neuro Oncology. Turning the concept on its head, he is going beyond the 'biopsy followed by the mandatory radiation therapy' routine. He is using surgery to physically remove the tumor. Steadily progressing into the so-called "no man's land" in the human brain like the hypothalamus and thalamus, he has set benchmarks in removing the tumours safely and effectively. He is the first person to do so in India. Using endoscopy as a tool, he has proven his expertise in treating the almost impossible Clival Chordoma tumour condition, time and again. The improbable Brain Stem is the next in his radar.

Talking about the trends that he spots, Dr. Kumar says, "The common problems that we see nowadays include Brain Tumours, Skull Base Tumours, Strokes, Spine related issues and facial pain syndromes". He is disturbed to note that brain tumors are the second most common occurrences in children, most of them Brain Stem, Midline or Cranial Brain tumors.

Under Dr. Kumar's exemplary leadership, the MGM Healthcare's Institute of Neurology is emerging as a center for excellence. With a handpicked team of 5 Neurosurgeons, 4 Neuro Anesthetists, 2 NeuroRadiologists, 3 Neuro Physicians, Clinical psychologists and psychiatrists who share his passion to heal, the department is providing succor to countless. The presence of a Neuropsychologist in the team adds to the heft. It has gained credence as a tertiary center which handles cases that are too complex and have been referred to by others. Venturing in where others fear to tread, the team has been handling and resolving extremely complicated cases.

MGM Healthcare boasts of some of the cutting edge instruments like high end Microscope, Advanced Neuro Endoscope, Neuronavigation, Intra operation Neuro Monitoring Systems, ICG Angiography, Peri Operative MRI and Intra Operation Ultrasonogram.

Dr. Kumar's team harness the best of technology to handle delicate and challenging procedures, carving out a name for the Hospital in Neuro Oncology, Skull Base Surgery, Cerebro Vascular Surgery, Spine Surgery, Pediatric NeuroSurgery, Neuro Trauma, Spine Trauma and functional procedures like Epilepsy Surgery and Pain procedures.

Dr. Roopesh Kumar &Team MGM Healthcare offer you the best of Neurosurgery in India.
