north—one more from last year—and six from the south, one less from last year. There has been some movement in the medical university rankings, though—six of the 10 rankings are from the north, one more than last year. The number of universities from the south among the top 10 goes down from five to two while two universities from the east join the list. The dominance of the north continues in the technical stream too, with five from this region finding a place among the top 10. In contrast, no northern university is among the top 10 law universities.

Like last year, the gap in the quality of education between government and private universities remains a cause of worry. Of a total score of 2,000, the score for the top 10 general universities in the government category ranges between 1,827 and 1,597. The corresponding range for private universities is 1,609 and 1,375. The top government medical college scores 1,943, while the top private medical college scores 1,430. The technical stream too exhibits such wide divides.

With 40 per cent of the universities in the country in the private sector, it's crucial that such gaps are bridged swiftly. The India Today Group's rankings are a step in that direction. ■

THE EXPANDING UNIVERSE

Nearly 300 new universities have come up in the last 7 years

YEAR	NO. OF UNIVERSITIES
2015-16	799
2016-17	864
2017-18	903
2018-19	993
2019-20	1,043
2021-22	1,047
2023	1,093
