Keeping pace with technological advancement, Amity University has introduced new programmes catering to the skills required in the present industry scenario. Some examples are programmes introduced in Artificial Intelligence, Data Science and Machine Learning, Defence Technology, Space Science and Nuclear Science & Technology.

Amity University provides cutting-edge industry-oriented postgraduate curricula that cover all aspects required by industry, research and academia. The electives provided are all application-oriented—practical-based education and hands-on experience in labs help students understand and learn theoretical concepts better.

In all, Amity University has 99 institutions, 43 research centres and eight research directorates. It offers over 400 industry-aligned and career-oriented programmes at the undergraduate and postgraduate levels and in 78 doctoral programmes. More than 44 new undergraduate and postgraduate programmes were introduced in the 2022-23 academic year in Engineering and Technology, Biosciences and Biotechnology, Management, Finance and Commerce, Arts, Humanities and Social Sciences, Natural Resources and Environmental Sciences, and Health and Allied Sciences. Four new doctoral programmes were also introduced.

The university promotes a 'start-up culture' among students and runs various programmes at the undergraduate, postgraduate and doctoral levels on entrepreneurship. "Each and every institution has Innovation and Entrepreneurship Coordinators (IECs) who motivate and mentor students for start-up creation," says Shukla.

Amity also encourages research in a big way and has seen the filing of more than 1,500 patents, of which 176 have been granted. It also has a strong collaborative arrangement with several foreign higher educational institutions (HEIs) in the US, UK, Australia, Singapore, Dubai and Canada.

Some popular programmes at the university are MBA, MA (Clinical Psychology), MCA, MSc (Biotechnology), LLM, MA (Journalism & Mass Communication) and BEd.

Over the past one year, Amity has witnessed an outburst of talent and innovation among postgraduate students, who are continually encouraged to explore their potential. They have successfully developed several high-tech innovative projects in engineering. Projects like the 'Design & Fabrication
