

MIOT International

DOES 'THAT' TIME OF THE MONTH

LAST LONGER THAN 5 DAYS?

Fibroids could be a reason.

Get fibroids treated without an operation.

Uterine Artery Embolisation
at MIOT's Fibroid Clinic

Prolonged, heavy and painful menstruation, a bloated tummy, lower back pain, frequent urination, and constipation could be symptoms of fibroids. An operation is no longer your only treatment option. Uterine Artery Embolisation at MIOT's Fibroid Clinic is a revolutionary minimally invasive treatment for fibroids. Get freedom from fibroids and resume an active lifestyle in just 3 days!

To consult* our
Interventional Radiology Specialist
call **+91 75400 46044**

*Prior appointment mandatory.

Why choose this treatment over an operation?

- **Preserves fertility • Preserves the uterus**
- **Shrinks fibroids without surgery**
- **No general anaesthesia**
- **No scars or stitches**
- **Fastest recovery time - short hospital stay**
