BACK TO THE CAMPUS

LIKE MUCH ELSE, COVID HAS CHANGED EDUCATION FOR EVER. HOW DO YOU PREPARE FOR THIS NEW FUTURE?

By Kaushik Deka

The year 2022 could be momentous for the future of education across the world. Covid brought life to a halt, including education in physical classrooms in the precincts of schools and colleges. Students instead took their place in front of their computer screens, as teachers struggled to recreate the spirit of the classroom online and keep the students engaged while educational institutes had to adapt teaching and examination methods to virtual modes. The pandemic wrought great disruption in the education sector.

This year has seen India and the world making a slow return to a 'normal' whose contours may not be as we remember them. For the moment, schools and colleges have reopened, physical exams are back and students and teachers are interacting in classrooms, not on digital platforms. However, even as things seem the same, they have changed. Digital learning has opened up multiple dimensions and opportunities in pedagogy. Technology has entered the
