EMERGING COLLEGE HUBS

SMALL TOWNS FROM WHICH COLLEGES HAVE FOUND A PLACE AMONG THE TOP 30

Every year, it provides the most accurate and detailed information on the performance of various colleges across five parameters—'Intake Quality and Governance', 'Academic Excellence', 'Infrastructure and Living Experience', 'Personality and Leadership Development' and 'Career Progression and Placement'. With transparent scoring in each parameter, it allows students a comparative assessment of the colleges they want to join. In the CUET application, students have to indicate their preferred course and college. We hope that the results of the India Today Best Colleges survey will help them make more informed decisions.

The survey is also useful as it takes note of not just the winners with a legacy but also of the relatively new colleges that show incremental improvement in their performance. Educationists acknowledge that this process has encouraged the spread of quality higher education to many places, beyond the small clutch of metros. The survey identifies the top three colleges in the major Tier 2 and Tier 3 cities, making the ranking of higher education institutes much more inclusive.

Education in India is a serious investment. Every parent and student wants to know the employment and remuneration potential of a degree in a particular course. This survey meticulously provides details of colleges offering the best return on investment, campus placements with the highest salary and also the lowest fees. Coming from a credible and verified source, such information can help parents and students make critical decisions.

And that's the ultimate goal and achievement of the India Today Best Colleges Survey—to serve as a reliable almanac on the state of college education in India. It's a responsibility the survey has fulfilled for the past two decades, documenting every change and development in the nation's collegescape, and heralding the arrival of every new star on the horizon. ■

METHODOLOGY

How the Colleges were Ranked

With more than 42,000 institutes of higher education in India, this 26th edition of the India Today Group's annual ranking of colleges intends to make it easy for aspirants to make critical career decisions based on a rich information base and data. Over the years, this ranking has become the gold standard for stakeholders such as recruiters, parents, alumni, policymakers, the general public and institutions. Since 2018, the survey has been conducted in association with reputed Delhi-based market research agency Marketing & Development Research Associates (MDRA). For this year, work on the ground was done between January and June. Colleges were ranked across 14 streams—arts, science, commerce, medical, dental sciences, engineering, architecture, law, mass communication, hotel management, BBA, BCA, social work and fashion design.
