TOP 3 GAINERS

Colleges that have made the biggest leap since last year

COLLEGE	RANK IN 2022	RANK IN 2021
COLLEGE OF DENTAL SCIENCES Davangere	31	37
DA PANDU MEMORIAL RV DENTAL COLLEGE Bengaluru	28	33
COORG INSTITUTE OF DENTAL SCIENCES, Virajpet	34	39

Throughout the lockdown, MAIDS encouraged its faculty to remain academically active. Major funded projects were taken up in association with CSIR, ICMR and DST. Its faculty members published 324 papers over the past year

to look forward to. "We have been busy upgrading infrastructure and opportunities for future exposure," says Dr Talwar. To begin with, the institute will get a new building, complete with a clinical section and special needs clinic. It will also have a national research centre for oral health and tobacco cessation in collaboration with the ministry of health and family welfare. Last year, it was declared to be the single point of contact in the country for the implementation and advancement of professionals in the field. The World Health Organization predicts that around 29 per cent of all adult Indians will be tobacco users; currently, the country accounts for 70 per cent of the global burden of smokeless tobacco (90 per cent of oral cancers in India are attributed to smokeless tobacco use). In this light, the new centre at MAIDS will be a welcome step in a country that needs to upgrade its tobacco cessation effort. "The centre will help spread awareness about the ill effects of tobacco, train dentists and be the centre for oral health research. Students and faculty both are equally excited about this new resource on campus," says Dr Talwar. Equal anticipation and excitement have attended the announcement of a new faculty-student exchange with Boston University to start from fall this year. It will provide the requisite exposure to various dental practices and learnings, a fundamental part of being at MAIDS. "Learning never stops and it doesn't come from a single source," says Dr Talwar. MAIDS observes this dictum in the practice. ■
