TOP PRIVATE UNIVERSITIES IN INDIA AND THE PIVOTAL ROLE THEY ARE PLAYING IN NATION BUILDING

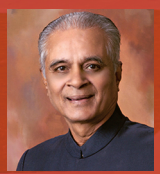

A university holds a crucial significance for a country especially India where 28% of the population is its youth. The most important role they have been assigned is the production of highly skilled manpower and research output to meet perceived targets.

In order to make India a front-line country and economy, the government has launched schemes such as Digital India and Make in India, which require the education system — especially higher education — to gear itself to the task of realising these missions. The pursuit and success of these goals will largely depend on the availability and commitment of the talented and trained human resource. It is here that the role of education is most crucial.

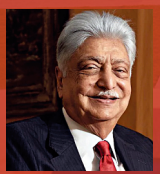

EXPERIENTIAL LEARNING AND DIGITAL INFRASTRUCTURE

With over 900 universities in India , the Government's vision to make higher education accessible and affordable to every student has started to become a reality, however quality in these universities is a serious question as only a handful are riding the quality wave to achieve global recognition. In the face of upheaval & disruption caused by pandemic, the academic institutions that had developed familiarity with the remote learning tools in the pre-pandemic period itself, found themselves with an edge over the others. Spearheading the list of the Indian Universities reaping the early movers advantage were, Galgotias University, Manipal Academy of Higher Education, BITS, J.S.S. Academy of Technical Education, the LNM Institute of Information Technology, Dr. D. Y. Patil Vidyapeeth,

DR. S.B. MUJUMDAR
Chancellor
Symbiosis University
