Poised For Next Phase Of Growth In North India

NARAYANA HEALTH

Jaipur

Narayana Health – A South India based Hospital group that stems from the thought leadership of providing affordable high quality medical care by renowned Cardiac Surgeon Dr Devi Prasad Shetty, has been expanding its footprint in North India over the years. While the group's first facility was established in Bengaluru with approximately 225 operational beds, since then they have grown to 22 State-of-the-Art Hospitals and an international subsidiary in the Cayman Islands with 4 Hospitals set up in Northern India in the last decade. With core values represented by the acronym "iCare", which comprises Innovation and efficiency, Compassionate care, Accountability, Respect for all, and Excellence as a culture; Narayana Health is one of the fastest-growing hospital networks in India. The NH group now features around 6000 operational beds through a combination of greenfield projects and acquisitions.

In the southern part of the country, Narayana Health has its facilities in Bangalore, Mysore, Bellary, Kolar, Shimoga, Dharwad, and Davengere. From South to North, East to West, Narayana Health truly has India covered - the frontier city of Jammu, to the National Capital Region, Jaipur, Mumbai, Ahmedabad, Bangalore and many more destinations are all home to its facilities and occupies a place of pride in India's healthcare delivery system. With aim of addressing the gaps in medical care in the region, Narayana Health started its journey in North India with the first Hospital in Jaipur in 2012 and another Hospital in association with Shri Mata Vaishno Devi Trust in 2016 and has since then never looked back.

Located in the peaceful southern part of the city, **Narayana Multispeciality Hospital, Jaipur** is one of the most advanced tertiary care facilities in the region with center of Excellence in Renal Sciences, Orthopaedics, Cardiac Sciences, and Organ Transplants. The Hospital boasts one of the strongest Adult & Paediatric Cardiac Sciences, High End ENT, Head & Neck, Cochlear Surgery, Neurosciences, Orthopedic and Limb Salvage Programs in the State with people travelling from remote corners of Rajasthan with the hope of a better life. The Hospital has recently started its Liver Transplant Programme and is further strengthening its Oncology Programme with addition of Organ Specific Cancer Expertise and Latest Radiation Therapy Infrastructure. Even during the challenging times of the covid pandemic when medical oxygen was a scarce resource in the region, the Hospital set up an Oxygen generating Plant which could produce oxygen measuring about 500 litres a minute enabling to save many more precious lives. The Hospital was recently in the news for saving the life of a 3-year-old after a 200 kg drum fell on him & ruptured his heart – treating such a case of traumatic chest injury causing a hole in the heart is very rare which makes it amongst the first few reported cases in the world.

In 2016, Narayana Health outstretched its services in remote corner of North India with the opening of NABH accredited **Shri Mata Vaishno Devi Narayana Superspeciality Hospital** at Katra in Jammu by the Hon'ble Prime Minister of India, Shri Narendra Modi. The Hospitals serves patients across over 25 specialities and superspecialities with a special focus on Cardiology & Cardio-Vascular Surgery, Medical & Surgical Gastroenterology, Orthopaedics and Joint Replacement, Renal Sciences, Oncology and Critical Care. The Hospital was aimed at providing such healthcare facilities to residents of Jammu & Kashmir region for which they had to travel across the state borders. Shortly from its inception the Hospital stationed an ACLS Ambulance in city of Jammu which was made available free of charge to residents in the city in case of any medical emergency. During the stampede on the first day of the year 2022 at Shri Mata Vaishno Devi shrine in Katra, the hospital acted swiftly to treat injured people with the best facilities including ICU and specialized treatment and made sure every single one of them was discharged in good health. In 2021 the Hospital also performed the first-ever Head and Neck Interstitial Brachytherapy in the Jammu region for Tongue Cancer on an 85-year-old man and gave him a new lease of life. The hospital has dedicated an area for the medical care of Ayushman Bharat Yojna beneficiaries and has several CSR programs to fund the medical treatment of the unaffording sections of the society enabling the best possible medical care to all in the region making the Hospital being recognized as one of the most advanced and trusted Tertiary Care Medical Facility in any medical emergency.

The success of all these projects led to a greenfield
