Narayana Health continues to consolidate its presence and strives to become the most preferred Healthcare provider in the North.

COMMANDER NAVNEET BALI
Regional Director - North,
Narayana Health

acquisition in Gurugram, and addition of Delhi based Cancer Hospital into the Group's kitty over the last 5-6 years. **Narayana Superspeciality Hospital, Gurugram** started as a 211 bedded capacity project slated to turn into a quaternary care facility in record time. The Hospital boasts of all leading Medical and Surgical Specialities and was amongst the few Multispeciality Hospitals in the country to start the Liver Transplant Program within an year of its inception making the hospital a preferred destination for Liver Care and Complex Transplants across the globe. The hospital has facilities for Stroke Rehabilitation, Complex Cardiac Procedures like LVAD, TAVI etc., High End Linac for Radiation Therapy and was the first Multispeciality Hospital[1] to offer Scalp Cooling Therapy in Gurugram. Apart from treatments and regular medical check-ups, the hospital provides regular preventive healthcare facilities and awareness camps from time to time – enabling the hospital to enjoy the image as a preferred neighbourhood hospital and the tertiary care facilities attract people from across states and countries.

On 2nd May 21 when the whole healthcare ecosystem was battling the challenges thrown by covid, an Oxygen Generator sent from France at 4 AM IST was received at a Hospital doorstep at about 3 PM IST that day and was made operational by same midnight enabling constant medical oxygen supply to its patients and help nearby medical institutions with oxygen supply as well. This was a rare feat witnessed at **Dharamshila Narayana Superspeciality Hospital, Delhi** which got associated with Narayana Health in 2017. Formerly been at forefront of cancer treatment, the Hospital has been transformed into multi superspecialized facility with center of excellence in Cardiac Sciences, Emergency Medicine and Critical Care, Neurology and Neurosurgery, Nephrology, Urology, and Renal Transplantation, Orthopaedics and Joint Replacement, among others. The Hospital has a robust Renal Transplant Program and is expected to receive the License for Liver Transplant shortly this year. The hospital has also launched one of the most advanced technology in Minimally Invasive Surgery techniques through Robotic Assisted Surgery Program and has the one of the leading Orthopedic and Joint Replacement Programs in its catchment.

With the recent collaboration with Ritesh Properties & Industries in setting up the first multi-specialty hospital at Ludhiana in Punjab, Narayana Health is now poised to establish the footprint in all leading four states of North India. The hospital will be spread over two lakh sq. ft with a capacity of 225 beds and is estimated to be operational by 2024.

With the network of hospitals bordering states it has added another advantage – synergies through sharing of clinical talent and biomedical infrastructure. The Hospitals have enabled its doctors in conducting outreach programs and operating complex cases in such scenarios where those clinical talents are scarce or unavailable in the region. For example an Interventional Neurologist from the Gurugram facility in times of need travels to Jammu to save the life an individual impacted by a stroke or a Hand and Microvascular surgeon from Jaipur could travel to other hospitals to attend to a patients whose limb would have been accidently amputated thus reducing the cost burden for the hospital to have a full time surgeon with such rare capabilities.

Over two decades of services and contributions of the Narayana Health in healthcare have not gone unnoticed. Dharamshila Narayana Superspeciality Hospital -Delhi, Narayana Superspeciality Hospital – Gurugram, Shri Mata Vaishno Devi Narayana Superspeciality Hospital – Katra have recently been awarded the AHPI Awards for excellence in Healthcare 2022 across the categories of Community Engagement, Patient friendly and Best Hospital to work for respectively. Narayana Health was also recognized for the Best Vaccination Program by a Private Healthcare Provided at the India Today's Healthgiri Awards. In a recent Survey by Outlook & NEB Research Dharamshila Narayana Superspeciality Hospital, Delhi and Narayana Superspeciality Hospital, Gurugram have also been recognized amongst the Best Multispeciality Hospitals in Delhi NCR. Narayana Multispeciality Hospital, Jaipur has been recognized as an Iconic Multispeciality Hospital of Rajasthan with Excellence in Cardiology and Cardiac Surgery by Times of India Group at Rajasthan Health Icons 2022. With the mission to deliver high-quality, affordable healthcare services to the broader population in India, Narayana Health group leads the way to healthify India.
