8.9%

Spike in energy demand in March this year

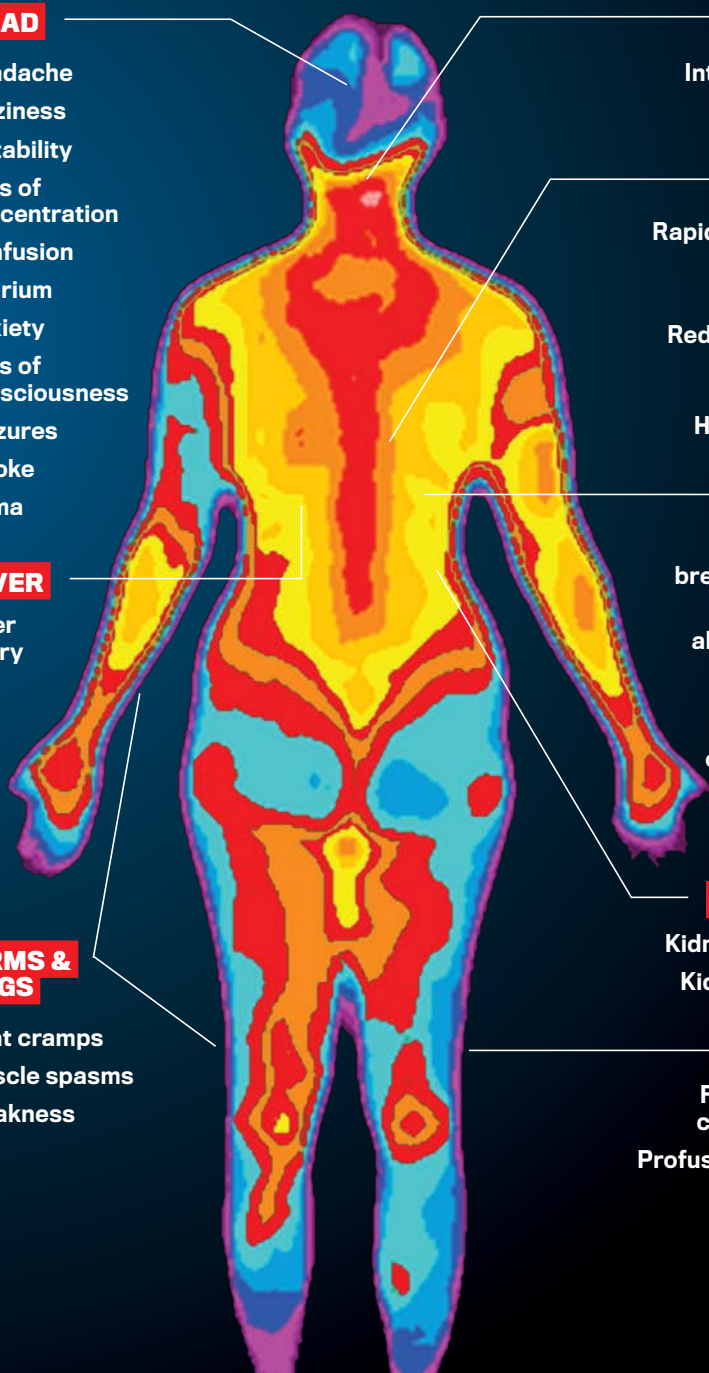

215-220

GIGAWATTS

Expected peak demand for power in May-June 2022

KEY HEALTH IMPACTS

A heat wave compromises our ability to regulate body temperatures and can result in a cascade of illnesses and conditions of hyperthermia, including heat cramps, heat exhaustion and heatstroke

HEAD

- Headache
- Dizziness
- Irritability
- Loss of concentration
- Confusion
- Delirium
- Anxiety
- Loss of consciousness
- Seizures
- Stroke
- Coma

LIVER

- Liver injury

ARMS & LEGS

- Heat cramps
- Muscle spasms
- Weakness

MOUTH

- Intense thirst
- Dry mouth

HEART

- Rapid heartbeat
- Irregular heartbeat
- Reduced blood flow to the heart
- Heart attack

LUNGS

- Increased breathing rate
- Worsened allergies and asthma
- Worsened chronic obstructive pulmonary disease

KIDNEYS

- Kidney disease
- Kidney failure

SKIN

- Flushed and clammy skin
- Profuse sweating
- Heat rash

EFFECT ON AGRICULTURE

The excessive heat, and so early in the year, has damaged the country's wheat harvest

15-20

MILLION TONNE

Estimated damage to wheat crop in the Jul. 2021-Jun. 2022 crop year due to heat wave

10-15

PER CENT

Fall in per acre yields (one acre equals 0.4 hectare), according to farmers in the major grain-bowl states of Punjab, Haryana, Uttar Pradesh, Rajasthan and Madhya Pradesh

*The IMD declares a heat wave when an area registers temperatures 4.5 to 6.4 degrees Celsius above normal for that day. When temperatures rise more than 6.4 degrees Celsius above normal, it is classified as a 'severe' heat wave
