WHERE CAN CONGRESS LOOK FOR GAINS?

Of these 12 states that account for 247 seats in the Lok Sabha, the Congress is the principal opposition in 10. In 2019, it won only 31 of these seats, notwithstanding its superlative performance in Punjab and Kerala. The party's recent electoral outings in both these states have been abysmal. Also, in six states (accounting for 100 seats), where it is in a direct contest with the BJP, the Congress won only three. That's where the Grand Old Party has to perform to push up its tally.
