Impact of CCRAS R&D Efforts

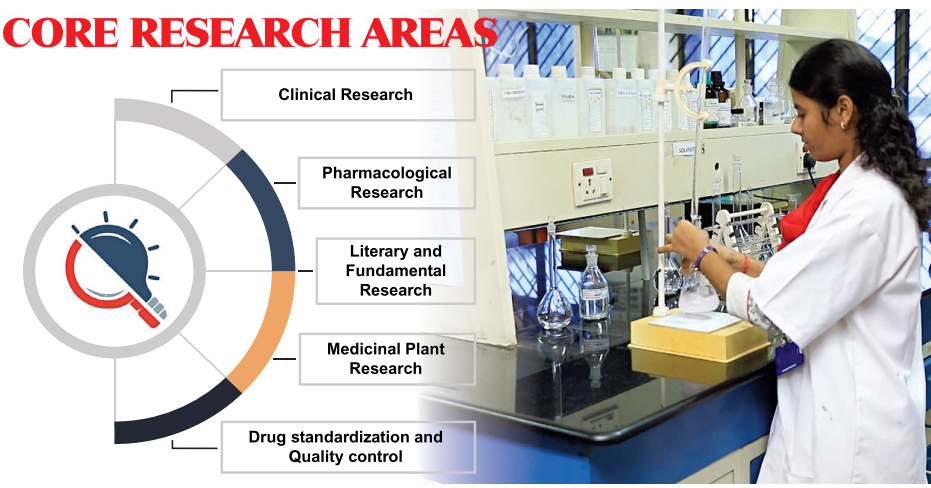

A dynamic, vibrant, and model research organisation, CCRAS has been quite successful in making significant contributions to the growth and development of popular Ayurvedic formulations. It is tirelessly working to transform research findings into real practice and make them accessible to the people at large. These formulations and technologies have earned the Council several patents for major diseases through extensive drug development research and it has transferred them to industries for public use. These include:

AYUSH-64 (malaria); AYUSH 82 (anti-diabetic formulation); BAL RASAYAN (general immunity and strengthening of children); AYUSH (Ghutti Cough and cold); AYUSH-56 (epilepsy); AYUSH –SS Granules (postnatal care for improving lactation); AYUSH AG Tablet (antenatal care); AYUSH PK Avaleha (for care after delivery and other complications of the puerperal period); AYUSH PG Tablet (antenatal care); AYUSH B R Leham (paediatric care), AYUSH SG (An Anti-rheumatoid arthritis preparation); clinical evaluation of the efficacy of Ayurvedic month wise regimen for Garbhini paricharya (Antenatal care); clinical evaluation of Ayush LND, a coded Ayurvedic formulation and Pushyanuga Churna in the management of abnormal uterine bleeding; clinical evaluation of the efficacy of Ayurvedic treatment regimen in the management of Kashtartava (Primary Dysmenorrhoea); Ayush Bala Rakshak Leham in the clinical management of Moderate (-2Z score) Acute Malnourished Children (MAM).

Apart from the above initiatives, the CCRAS has been carrying out a wide range of activities including revival, retrieval, and documentation of Ayurveda texts and Indian medical heritage. It has also been playing an instrumental role in taking benefits of government initiatives to people through large-scale programs including diverse research-oriented public healthcare activities and Ayush Wellness Clinics etc.

The Council has helped India attain global leadership for the treatment and prevention of emerging lifestyle-related diseases and health requirements. Many herbs like Ashwagandha, Shatavari, Guduchi (Giloy), Amalaki, and Bhallataka have well-known Ayurvedic formulations which after research have been proven to enhance immunity. These medicines have proved useful for enhancing the quality of life in lifestyle diseases. The Council is significantly contributing toward the realisation of Ayushman Bharat by promoting better health through evidence-based Ayurvedic principles and practices.

CORE RESEARCH AREAS

Technology Transfer

PRODUCT NAME	INDICATIONS
AYUSH-64	Malaria, Repurposed for Covid-19
AYUSH 82	Type 2 Diabetes mellitus
BAL RASAYAN	General immunity and strengthening of children
AYUSH Ghutti	Cough and cold
AYUSH-56	Epilepsy
AYUSH –SS Granules	Post natal care (for improving lactation)
AYUSH AG Tablet	Ante natal care
AYUSH PK Avleha	Post natal care (for care after delivery and other complications of puerperal period)
AYUSH PG Tablet	Ante natal care
AYUSH B R Leham	Paediatric care
AYUSH SG	An Anti rheumatoid arthritis preparation
Ayush CCT	Herbal Tea

Revenue generated from the technology transfer: Approx. Rs 4.15 crores
