THE WARNING SIGNALS

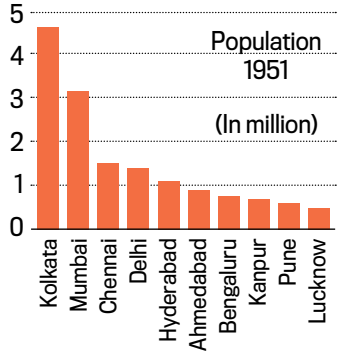

30 INDIAN CITIES WOULD FACE A GRAVE WATER RISK BY 2050, REVEALS A REPORT BY WORLD WIDE FUND FOR NATURE (WWF) RELEASED IN 2020

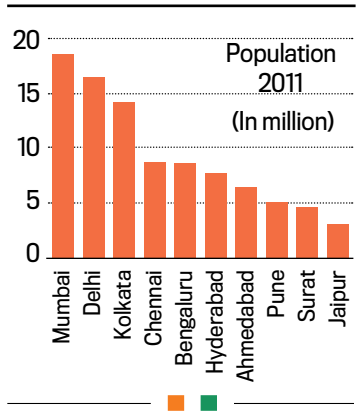

50 MILLION PEOPLE IN 15 CITIES LACK ACCESS TO SAFE, AFFORDABLE DRINKING WATER, STATES A UNICEF INDIA REPORT IN 2021

EVERY SIXTH URBAN INDIAN LIVES IN SLUMS, AND FOUR OUT OF 10 SLUM-DWELLERS DON'T HAVE ACCESS TO DRINKING WATER

PEOPLE AND THE CITIES

How the ranks of India's 10 most populous cities have changed between 1951 and 2011

sanitation, and urban mobility is gradually improving with metro rail in several cities, the living conditions have been abysmally poor. In the *Economist*'s Global Liveability Index, 2022, Indian cities were at the bottom with the highest rank being 140th out of 173 cities evaluated.

Most Indian cities need a two-pronged approach for being liveable—plan-based development and corrective measures for areas that have grown by flouting norms. ■

PERFORMANCE INDICATORS

Most living in urban India have access to basic amenities, per government data

99% HOUSEHOLDS HAVE ACCESS TO DRINKING WATER SOURCE

99% HOUSEHOLDS HAVE ELECTRICITY

99% HOUSEHOLDS HAVE ACCESS TO BASIC SANITATION
