
of emphasis on IT (Information Technology). In a big leap forward to give a push to e-learning, Chief Minister Sh. Manohar Lal recently launched the e-Adhigam scheme., one of the most ambitious digital learning programme in the country Under the the Advance Digital Haryana Initiative of Government with Adaptive Modules (Adigham) scheme nearly three lakh tablets distributed among school students of Classes 10 and 12. The devices come with pre-loaded content along with personalised and adaptive learning software, and 2GB free data. The devices were distributed among students in 119 blocks across the state simultaneously.

The government proposes to provide the gadget to five lakh students in the segment of Classes 10-12. However, Class 11 students would get them after they clear the Class 10 board examinations and qualify for the succeeding year. "From next year, all classes from 9-12 will be covered," said the chief minister.

This is for the first time that personalised digital devices have been provided free of cost to students at this scale in the country with a mission that children learn at their own pace at their own level.

Tablet is a New Classroom

As the chief minister takes forward the vision of the prime minister he underlined that the tablet is the new classroom and "through e-books, it has become a full-fledged classroom". "Tablets and data are tools for students which will help them acquire skills of the 21st century and open new opportunities. Through e-learning, students of Haryana will become global students," he said. With these tablets, as the chief minister envisioned, it would no longer be just classroom teaching, but would help children remain connected with the affairs of the world. The state government is committed to provide tablets and free data to five lakh students studying in government schools under the e-learning scheme.
