by them but also offer an edge over their government counterparts in their modern teaching tools attuned to recent trends in legal education. Besides, private universities have dedicated internship and placement cells run by industry specialists who ensure that their students not only benefit from practical training through mandatory internships but are also prepared by the end of their law program to be hired by top law firms, law chambers, and corporate houses.

SAVE THE WORLD: CAREERS IN MEDICINE

MBBS (Bachelor of Medicine and Bachelor of Surgery) is the most sought-after career option for all students taking up Physics, Chemistry and Biology as subjects in their class 12th. The degree is obtained after 5.5 years of education and a year's internship that is compulsory. Admission to any MBBS college in India is based on the marks obtained in NEET (National Eligibility Cum Entrance Test). BDS (Bachelor of Dental Sciences) is a 4.5 year-long education journey along with an internship. The qualifying exam is the same as taken for entry in MBBS. BHMS (Bachelor of Homeopathic Medicine and Surgery) is an undergraduate course of almost 5.5 years for candidates interested in studying homoeopathy. BHMS also involves an internship for one year. Different entrance exams for getting admission to BHMS are NEET, PU CET, AP and many others. BAMS (Bachelor of Ayurvedic Medicine and Surgery) is a 5.5 years course with a year of compulsory internship. These sciences work upon the process of natural healing using medicines prepared from natural herbs, vegetables, and plants. The entrance exams related to the course are NEET, OJEE, KEM etc. All these courses lead to careers as doctors – a profession that is by nature profitable, highly respected and committed to serving humanity.

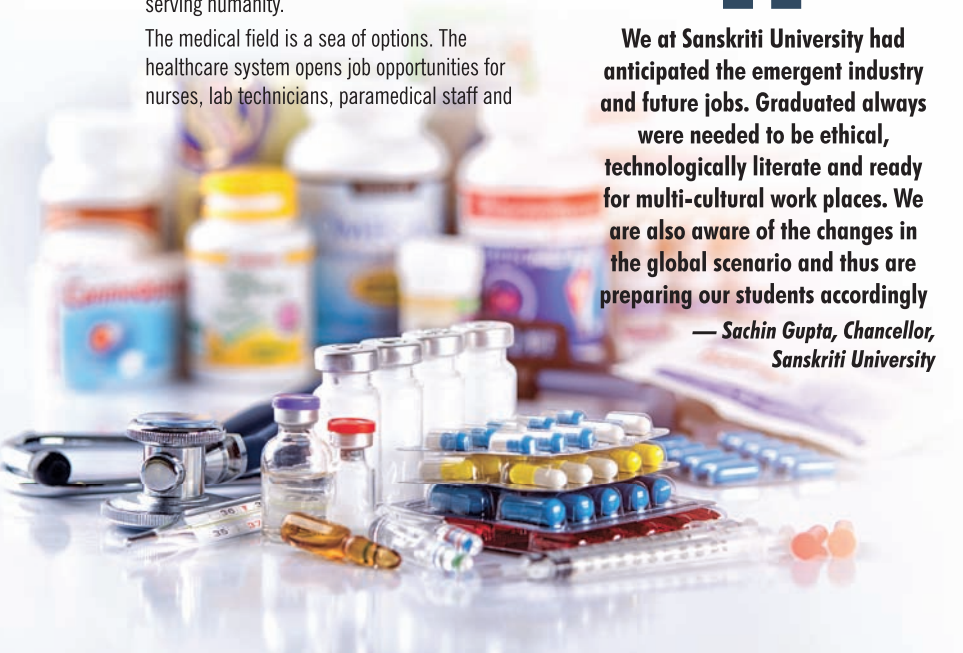

The medical field is a sea of options. The healthcare system opens job opportunities for nurses, lab technicians, paramedical staff and other trained professionals for a variety of related job requirements. Besides, veterinary and animal husbandry are equally good fields for the people who genuinely love animals and want to give them better lives. BOT (Bachelor of Occupational Therapy) is a field that aims to prevent, cure and rehabilitate people who are physically, mentally or neurologically disabled and challenged. This bachelor's degree is of 4 years and trains the students to take care of the patient. The skills taught to the students include observation, treatment planning, clinical reasoning, and its implementation. Admission to the course is based on merit and through entrance exams. The major exams conducted for admission in BOT are CMC Vellore Entrance Exam, Manipal University BOT Entrance Exam, and AIIPMR Entrance Exam.

B. Pharma (Bachelor of Pharmacy) is the art of preparing and dispensing drugs. The complete course is four years long that includes practical sessions too. All the rules and regulations for B. Pharma are laid down by the Pharmacy Council of India. The popular job opportunities in this sector are analytical chemist, drug inspector, medical transcriptionist, drug technician, and drug therapist, among others. Admission to the course is through the entrance tests or on a merit basis. Some popular exams are MHT CET, BHU B Entrance exam, Goa common Entrance Exam, and many others.

We at Sanskriti University had anticipated the emergent industry and future jobs. Graduated always were needed to be ethical, technologically literate and ready for multi-cultural work places. We are also aware of the changes in the global scenario and thus are preparing our students accordingly

— Sachin Gupta, Chancellor, Sanskriti University

B. Sc. Nursing (Bachelor in Nursing) is an integral part of the healthcare system, a noble profession with a great number of job opportunities available. In nursing, there are two types of courses: Basic and Post Basic. The basic course is of 4 years and the post-basic course is of 2 years.

The minimum eligibility is 45% marks in class 12 in the medical stream for taking admission in nursing courses. There are several entrance exams at different levels for the admission process. AIIMS NURSING, MSN, and PGIMER NURSING are some of them. There are many government and private institutes that offer B.SC nursing.

HIT THE BULL'S EYE: CAREERS IN ENGINEERING

Engineering is one major career goal for all science students with mathematical competence and a strong base in Physics and Chemistry. Good salary and immense scope for growth are two major reasons that make this career lucrative and highly competitive too. Some of the top institutions in the stream include IITs, BITS Pilani and DTU. Besides the most popular branches in engineering like Computers, electrical, electronics, chemical and marine engineering, students also choose to study automotive engineering (IIT Madras, Delhi Technological University, Anna University & SRM University in Chennai, PSG College of Technology, Coimbatore, Galgotias University, Greater Noida) and aerospace engineering (IIT Kanpur, IIT Bombay, SRM University, and IIST in Trivandrum). Courses like biotechnology engineering combine principles from biosciences and engineering to develop and manufacture products. Some of the best colleges that offer this course in India are IIT Kharagpur, IIT Roorkee, BIT Mesra, and DTI. The field of nuclear engineering has also emerged as an interesting course that deals with designing, constructing, operating and maintaining nuclear reactors, power plants, and weapons. The top colleges in India that offer this course are IIT Bombay, IIT Delhi, Indian School of Mines in Dhanbad and IIST in Trivandrum.

THE NOBLE PROFESSION: ACADEMIA AND SKILL DEVELOPMENT

Students who are oriented towards deep learning and research and love to spend hours in libraries working on their writing projects may
