LOCATION OF 22 DSEU CAMPUSES ACROSS DELHI

DSEU - A new ray of Hope

With this background, the Delhi government established Delhi Skill and Entrepreneurship University in 2020 to equip students with world-class skill education that gives them access to wide-range of opportunities in growing industries like e-commerce, web designing, logistics and more.

The courses are in alignment with the vision of the National Education Policy (NEP 2020), offering multiple entry-exit options. The curricula for courses have been designed in a way that up to 70% of weightage is given to on-campus training, internships, on-the-job-trainings and special modules and workshops. The wide range of courses that the University runs covers domains as vast as Retail management, Emergency medical technology, Automobile engineering, Software programming and Transportation. Along with undergraduate, postgraduate, diploma, and advanced diploma courses, the University is also launching short term courses such as a Communicative English Course that make students more employable.

The University through its efforts will create a win-win situation for the youth and the industry by filling the existing gaps in skill training. It wants its students to be self-sufficient as well as value and nurture various interdependent facets of our society.

While the need for skill-based courses is felt by industry as well as students, it requires comprehensive systems and institutions to lead the way. The University also seeks to engage students with their surrounding communities through community engagement projects. The aim is to create a line of professionals that are well-equipped to become agents of community transformation and help the country realise its goals of sustainable growth.

"Our University due to its distribution across Delhi will not be a big sprawling island of excellence. Our dispersed campuses give us and our students the chance to be closer to communities and be more involved with them. We want to reduce barriers to University access for the community" said Prof. Vohra, VC DSEU.

NEW-AGE COURSES

- Advanced Diploma in **Automotive Mechatronics**
