

their homes. Despite the huge scale involved, it managed to successfully pull off the event.

Continuing to thrive during the pandemic, Galgotias University was awarded the QS award for e-learning and also received recognition from the Deputy Chief Minister of Uttar Pradesh for ranking No.1 in providing e-content to the online digital library of the Government of Uttar Pradesh.

TAPPING INTO THE EXISTING RESOURCES

With the overnight shift from physical classrooms to e-rooms, also throwing up coordination challenges, many Universities deployed their own apps to streamline operations. The mobile apps at Galgotias, Manipal and SRM continue to not only help students to plan their lectures but also keep them informed of all seminars, activities and events. They keep the students informed and updated on their attendances, results, and course handouts provided by faculty. Additionally, these apps have been constantly enhancing their utility with new & upgraded features.

STAYING ABREAST WITH THE CHANGES

With Industry 4.0 already having made inroads in India, the need is strongly being felt for a regular supply of manpower equipped to deal with this dramatic shift in technology. It is important to consider the fact that this new phase in the Industrial Revolution focuses heavily on interconnectivity, automation, machine learning, and real-time data. The increase in automation and connected systems also demand workforce transformation. And to meet the requirements of the fourth generation industrial revolution, academic institutions are called on to supply a tech savvy talent pool

Time has come for experiential learning to enter classrooms where students are engaged and knowledge is disseminated by innovative teaching and learning practices.The era for rote learning is now over !

— Dhruv Galgotia, CEO, Galgotias University

My experience with graduate students made me realise that you can make a bigger impact if you can make an intervention in the way students learn in their formative years," The idea is to alter students' learning experience to make the process of learning enjoyable. "If the students learn in the right way and, if they like learning, they will secure good marks anyways,
