(b) 2,3 only
(c) 1,3 only
(d) 1,2,3

12. Which of the following are correct regarding occurrence of tides?
    1. Spring tides occur twice a month.
    2. Tidal pattern, featuring two high tides and two low tides each day is called as Diurnal tide.
    3. Once in a month, when the moon's orbit is closest to the earth (perigee), unusually high and low tides occur.

    Select the correct option
    (a) 1,2 only
    (b) 2,3 only
    (c) 1,3 only
    (d) 1,2,3

13. Which of the following is/are correct regarding characteristics of tides?
    1. In the open ocean tidal currents are relatively weak.
    2. The large continents on the planet, however, block the westward passage of the tidal bulges as the Earth rotates.
    3. The tidal bulges on wide continental shelves have greater height.

    Select the correct option
    (a) 1 only
    (b) 2 only
    (c) 3 only
    (d) 1,2,3

14. Which of the following is/are incorrect regarding coral reefs?
    1. Fringing reefs are reefs that grow directly from a shore. They are located very close to land, and often form a shallow lagoon between the beach and the main body of the reef.
    2. Atolls are extensive and largest of three reefs, linear reef complexes that parallel a shore, and are separated from it by lagoon.
    3. Atolls are far more common in the Indian ocean than any other ocean.

    Select the correct option
    (a) 2 only
