4. Bahama Island-Atlantic ocean, located S-E of Florida

48. Statement 1: CORRECT—Guyots are flat topped hills.
Statement 2: INCORRECT—Diamantina Trench is located west of Australia.
Statement 3: INCORRECT—North and Central Pacific: Characterised by maximum depth and a large number of deeps, trenches and islands.

49.
1. Submarine canyons are so called because they resemble river canyons on the continents.
2. They look like long V-shaped valleys with steep sides.
3. Most canyons are formal by turbidity currents.
4. They have tributaries similar to those of river cut canyons on land.
5. Most of the canyons are formed by continental rifting.
6. They are similar to youthful river valleys on the land but are much deeper than the river valleys on the land.

50. Statement 1: INCORRECT—In the deep sea, tsunamis have very long wave length which often exceeds 500 to 700 Kms. But their amplitude is very low and rarely exceeds 1 meter. However, on reaching coast, wave length of tsunamis is reduced considerably and their amplitude increase to 10-30 meters.
Statement 2: CORRECT—Ocean Deposits:
- Organic deposits originate in the ocean itself.
- Blue mud is the most widely spread of all the muds.
- Calcareous deposits consist of remains of those animals which have high proportion of lime.

Statement 3: CORRECT—Atlantic Ocean is the youngest of all oceans.
