# Ecology, Environment, Climate Change and Disaster Management

## DIFFICULTY LEVEL: EASY

1. Which of the following best describes the term “habitat”?
   (a) The region on earth that supports life.
   (b) An area where an organism lives.
   (c) A functional unit of the environment.
   (d) The flora and fauna of a geographical area.
2. Which of the following components can act as a limiting factor for development of plant life?
   1. Spectral quality of solar radiation
   2. Altitude
   3. Salinity of water
   4. Frost

   Choose the correct option using the codes below.
   (a) 1, 2 and 3 only
   (b) 1, 2 and 4 only
   (c) 2, 3 and 4 only
   (d) 1, 2, 3 and 4
3. The appearance or behaviour or structure or mode of life of an organism that allows it to survive in a particular environment is known as:
   (a) Variation
   (b) Adaptation
   (c) Adaptive variation
