(d) Speciation

4. Identify the correct order of levels of organisation.
   (a) Population < Community < Ecosystem < Biome
   (b) Population < Community < Biosphere < Biome
   (c) Population < Species < Ecosystem < Biome
   (d) Community < Population < Ecosystem < Biome
5. Consider the following statements regarding ecological succession.
   1. Secondary succession happens at faster rate unlike primary succession.
   2. All habitats are environments, but all environments are not habitats.

   Which of the above statements are correct?
   (a) 1 only
   (b) 2 only
   (c) Both 1 and 2
   (d) Neither 1 nor 2
6. The capacity of the ecosystem of maintaining their state of equilibrium is known as:
   (a) Haemostasis
   (b) Homeostasis
   (c) Stability
   (d) Resistance
7. Which of the following concepts involve tropic level interactions?
   1. Food Chain
   2. Food Web
   3. Ecological Pyramid

   Choose the correct option using the codes below.
   (a) 1 and 2 only
   (b) 2 and 3 only
   (c) 1 and 3 only
   (d) 1, 2 and 3
8. The process of bacterial and fungal enzymes degrading detritus into simpler inorganic substances is called:
   (a) Humification
   (b) Mineralisation
   (c) Catabolism
