1. Trees with small broad leaves are widely spaced and never very tall.
2. Fire is an important hazardous factor in this ecosystem, and the adaptation of the plants enable them to regenerate quickly after being burnt.
3. This biome is most notable because trees there go through four seasons. Leaves change color in autumn, fall off in the winter, and grow back in the spring; this adaptation allows plants to survive cold winters.

Choose the correct combination using the codes given below:

(a) Tropical Rainforest Biome
(b) Temperate Deciduous Biome
(c) Tropical Deciduous Biome
(d) Sub-tropical Deciduous Biome

48. Which of the following statements about lagoons and estuaries are correct?
    1. Lagoons are usually deeper than estuaries.
    2. Lagoons are more saline than estuaries
    3. Lagoons are formed due to emerging of coastlines whereas estuaries are mostly formed due to submerging coastlines.

    Answer using the codes give below:

    (a) 1 and 2 only
    (b) 2 and 3 only
    (c) 1 and 3 only
    (d) 1, 2, 3 and 4

49. Consider the following statements:
    1. Summer smog forms when pollutants such as sulphur oxides and organic compounds react together in the presence of sunlight.
    2. Delhi is more likely to face smog than Mumbai or Kolkata.

    Choose the correct combination using the codes given below:

    (a) 1 only
    (b) 2 only
    (c) Both 1 and 2
    (d) Neither 1 nor 2

50. Consider the following statements on bioremediation to combat pollution.
